**QUESTION 1**

To support the "buy one get one free" functionality, when a consumer adds an item to the shopping cart, another applicable item should be added automatically. The customer has an external service that they intend to use to determine the applicable item.

How can this feature be implemented and made available via REST Service in IBM WebSphere Commerce V7 FEP 7, with minimum customization?

- A. Extend OrderItemAddCmd/OrderCalculateCmd to call the external service. The extension will automatically be invoked when the CartHandler service is used.
- B. "Buy one get one free" is a supported type of promotion, it can be created and managed using the Promotions tool in IBM Management Center for WebSphere Commerce. The feature is available in the out of the box CartHandler service.
- C. Implement a ResourceHandler which invokes a custom entity bean. The custom entity bean calls external service and updates the PX_PROMOTION table. OrderItemAddCmd will automatically process the table and add the free item accordingly.
- D. Extend the out of the box OrderHandler, which invokes processOrChangeOrder() in OrderHelper: update ChangeOrderSOIBODMapping.xml configuration with custom implementation of OrderItemAddCmd/OrderCalculateCmd to call external service and add the free item accordingly.
