QUESTION 1

In the Web Applications tab of a workflow system, a P8 administrator defined and selected Workplace XT as the default web application.

For what purpose(s) does the workflow system use the above information?

- A. To get the server base URL to provide Process Engine Web Service.
- B. To launch the Process Engine applets (e.g. Process Configuration Console).
- C. To determine the email notification template and the server base URL to provide Process Engine web service.
- D. To determine the email notification template and the locations of launch and step processors for the workflows that are processed in the workflow system.

Correct Answer: C

QUESTION 2

A system administrator has successfully configured Content Federation Services for IBM FileNet Image Services and needs to start federating documents from Image Services to the IBM FileNet P8 Content Engine.

What is the name of the tool that is used to start federating the documents in the above scenario?

- A. Remote Admin Console
- B. Remote Xapex Interface
- C. Remote Admin Task Manager
- D. Remote Configuration Manager

Correct Answer: B

QUESTION 3

During the weekend, when there is little to no user activity on the Content Platform Engine server, the FileNet specialist submits an indexing job for a document class that has 2 million documents.

What file should the FileNet specialist review to help gather information during indexing, e.g. memory usage and queue size, about the IBM Content Search Services server?

- A. monitor*.csv
- B. adminAudit.csv
- C. systemevents.log
- D. serverConfiguration.log

Correct Answer: D

QUESTION 4

While reviewing the FileNet Deployment Manager (FDM) logs to understand why an import failed, the administrator sees the following error message:

The current import process is attempting to update system properties and the current user does not have security right to do this for object store . Some or all of this import may fail until the current user is assigned the "modify certain system properties" right on the object store.

How can this problem be corrected?

- A. Configure FM to use the P8 Administrative user.
- B. While completing the FDM import wizard, select the option "modify certain system properties".
- C. Using the Administration Console for Content Engine, grant the user performing the import "modify certain system properties" on the "source" object_store.
- D. Using the Administration Console for Content Engine, grant the user performing the import "modify certain system properties" on the "destination" object_store.

Correct Answer: C

QUESTION 5

A consultant for an airline needs to federate some content from their IBM Content Manager OnDemand (CMOD) system into their IBM Content Platform Engine system.

Which of the following web based user interfaces only supports downloading the federated content from CMOD but not viewing it?

- A. IBM WEBi
- B. Workplace
- C. Workplace XT
- D. IBM Content Navigator

Correct Answer: C
