-  **800,000+** Satisfied Customers

### QUESTION 1

A customer has deployed a two node active-active IBM Sterling B2B Integrator (SBI) cluster in the secure zone on two servers. The customer has installed two servers in the DMZ for the purpose of installing remote SBI Perimeter Servers to facilitate communications with external partners. Each server in the DMZ is multi-homed (two external facing NIC cards with two external IP addresses and one internal facing NIC card) to two different external facing network segments for redundancy in case one network segment fails or a NIC card fails. External partners will connect to an external IP Load Balancer that will distribute inbound FTP/S, SFTP and HTTP Client sessions across the Perimeter Servers. The Perimeter Servers will be installed without using wildcard addresses. The customer requirement is that if any single server fails and one of the two external facing network segments fail, all the other SBI nodes and remote Perimeter Server instances must continue to actively handle inbound sessions for each protocol. What is the minimum number of remote Perimeter Server instances that must be deployed in the DMZ?

- A. 4
- B. 6
- C. 8
- D. 12

Correct Answer: C

---

### QUESTION 2

IBM Sterling B2B Integrator (SBI) uses a certificate to encrypt persisted documents. If this certificate needs to be replaced with a deployment specific certificate, which certificate store is the new certificate imported into before updating the certificate name in the customer overrides property file?

- A. CA
- B. Trusted
- C. System
- D. Certificate

Correct Answer: C

---

### QUESTION 3

A company needs to call an executable program on a remote server. Which service or adapter can be configured to work with remote systems?

- A. Remote Server Adapter
- B. Command Line Adapter 2
- C. Execution Control Service

D. Encoding Conversion Service

Correct Answer: B

---

**QUESTION 4**

A global persistence level is set to PERSISTENCE\_NONE. Which Business Process (BP) persistence settings will result in more information being persisted?

- A. System Default
- B. Step Status Only
- C. Step Status - Engine May Override
- D. BP Start Stop - Engine May Override

Correct Answer: C

---

**QUESTION 5**

An analyst is responsible for implementing an AS2 solution for their company using IBM Sterling B2B Integrator (SBI). After certificates and connections information have been gathered, what is the first thing that must be created in the system?

- A. Partners
- B. Code List
- C. Relationship
- D. Organization

Correct Answer: D
