**QUESTION 1**

A campaign user has come to the specialist indicating that one particular flowchart is taking too long to run, and they need help finding the bottleneck. What are the most logical first steps to try to isolate the actual bottleneck(s)?

- A. The specialist needs to send the user a re-sizing questionnaire, since this means the user's system is undersized.
- B. The specialist should request that the user monitor the performance of the database because it's most likely a database problem.
- C. The specialist needs to ask for a copy of that flowchart's log file and the flowchart template file, and use it to begin the initial assessment of the situation.
- D. The specialist needs to ask the user a sequence of questions about all of the flowcharts such as how many records do they select initially, how many segment boxes do they have, and how many output records do they write per day.

Correct Answer: C

QUESTION 2

If a database loader utility is properly configured and used, it will almost always help to improve flowchart performance. Where can the specialist determine if the loaders are configured for use?

- A. Look on the partitions level for the loader settings, as these will control all data source loader settings.
- B. Look on the partitions level for the server and then optimization settings, as these will control all data source loader settings.
- C. Look on the partitions-partition[n]-datasources level and then look for the UA_System_Tables data source loader settings, as these settings will override all other data sources.
- D. Look on the partitions-partition[n]-datasources level and then look for both the UA_System_Tables database loader settings, as well as all of the user table data source loader settings.

Correct Answer: D

QUESTION 3

In a Unica Campaign flowchart Select process, how can a custom macro be profiled so that it appears in the Select process "Available Fields" menu?

- A. Select "Options" from the main menu in a flowchart, choose "Custom Macros...". Click "New Item" and add the macro name and field expression. Go to the "Select" process and choose the macro from the "Available Fields" column.
- B. Select "Options" from the main menu in a flowchart, choose "Custom Macros...". Click "New Macro" and add the macro name and field expression. Go to the "Select" process and choose the macro from the "Available Fields" column.
- C. In the "Select" process box, create a "Derived Field" with a field name Profile_Test and enter the macro name in the expression field. Go to the "Select" process "Source" tab and select the macro from the "Available Fields" column.
- D. In the "Select" process box "Source" tab, click the Input field and the drop-down list appears. Go to "Tables", select

"UA_CUSTOMMACROS", and select the macro from the list. Select the macro when it appears in the "Available Fields" column.

Correct Answer: C

QUESTION 4

In a Unica Campaign Flowchart, a customer database table (see below) is mapped in a Select process box. There is a requirement to output the following fields: CustomerID, and an Age group which would have the values "YOUNG" for customers whose age is less than 40 and "OLD" for customers whose age is greater than 40. This column will be consumed by another downstream process in the flowchart.

CustomerId	CustomerType	Age	Country
AW00030001	S	20	India
AW00030002	S	25	UK
AW00030003	S	25	US
AW00030004	S	57	India
AW00030005	S	23	India
AW00030006	S	67	US
AW00030007	S	36	US
AW00030008	S	44	India
AW00030009	S	77	UK
AW00030010	S	34	UK

Ideally, which steps should be executed to get the task done?

- A. Alter the table to add the required column and map the table again in the flowchart.
- B. Create a derived field in the Select process using the required logic and use it for further processing in the flowchart.
- C. Create a custom macro with the required logic and use it in User variables for further processing in the flowchart.
- D. Create a Derived field with the Persistent option processing the required logic and use it for further processing in the flowchart.

Correct Answer: D

QUESTION 5

What JDBC type database driver works with Unica products?

- A. Type 2 JDBC drivers must be used.
- B. Type 4 JDBC drivers must be used.
- C. Any type 4 and above JDBC drivers can be used.
- D. Any certified JDBC drivers that have been tested can be used.

Correct Answer: B
