QUESTION 1

When should a developer execute a personal build?

- A. before the deliver action
- B. before the checkin action
- C. before the accept action
- D. before the rebase action
- E. before the checkout action

Correct Answer: A

QUESTION 2

To start the RQM command-line adapter, what must you know? (Choose three.)

- A. the jazz repository URL
- B. a user ID with the appropriate licenses to log in as an adapter
- C. the name of the project area, if it is not the default RQM project area
- D. the path to the batch file or shell script to be executed

Correct Answer: ABC

QUESTION 3

During the development and test phase of a project, the team's process requires that the architect check all changes made for a defect to ensure that the work is in-line with the solution design principals. Using the work items feature available with CLM, which three steps assist in making this possible? (Choose three.)

- A. define a role of "Architect" and assign it to the appropriate users
- B. for the relevant transition in the work item lifecycle, add a precondition for a "Required approval" by the architect
- C. create a work item template containing the values that are applied when an architect has reviewed a work item
- D. add a new state for the work item called "Requiring Architecture Approval", where the lifecycle will pause until the architect approves
- E. insert a new Boolean field in all work items to indicate whether or not the work item has been checked by an architect

Correct Answer: ABD

QUESTION 4

What are two valid usage scenarios for integrating Rational BuildForge with CLM 4.0.1? (Choose two.)

- A. start BuildForge jobs without leaving the RTC UI
- B. for regression testing
- C. track, control, and report on the execution of complex tasks distributed over multiple lab resources
- D. create process definitions of how a build has to be done

Correct Answer: AC

QUESTION 5

When completing a plan item, which role does the test team provide?

- A. creates an iteration plan and chooses which plan items to target for the first iteration
- B. reviews the plan items that are targeted for the iteration and the related high-level requirements, and creates detailed requirements
- C. elaborates the test cases that are associated with the development tasks
- D. checks in their change sets and runs personal builds to test the changes in their own workspaces
- E. runs a team build, reviews the results, and tags the build as ready for testing

Correct Answer: C
