QUESTION 1

Which of the following conditions apply when merging authorizations for the same object? (Choose two.)

A. Changed authorizations can be merged with manual authorizations, as long as the activation status is the same.

B. Changed authorizations can be merged with manual authorizations, even if the activation status is different.

C. Both the activation status and the maintenance status of the authorizations do not match.

D. Both the activation status and the maintenance status of the authorizations match.

Correct Answer: AD

QUESTION 2

During maintenance of a role you notice that the status text for an authorization object indicates status "Changed New". What does this status text mean?

A. The authorization object has been flagged as a critical object.

B. The authorization object must be maintained again.

C. The authorization object was used to create a new authorization because the initial configuration of the role changed a default value maintained in SU24.

D. The authorization object was used to create a new authorization because the values contained in SU24 differ from the SAP Standard contained in SU25.

Correct Answer: C

QUESTION 3
