- B. Profit center.
- C. Profitability segment.
- D. Cost center
- E. WBS element.

Correct Answer: ADE

QUESTION 2

Which field in the material master determines if the value of the material stock changes when releasing a cost estimate for this material?

- A. Valuation type
- B. Valuation class
- C. Price control
- D. Price determination

Correct Answer: C

QUESTION 3

A customer complains that in various FI postings both fields, cost center and internal order, are mandatory. Which setting causes these two fields to be mandatory?

- A. The field "actual posted cost center" has accidentally been maintained in the master of the respective internal order (tab "control data").
- B. Both cost centers and internal orders have accidentally been set to "mandatory" in the "status variant" field (group "additional account assignment").
- C. Both cost center and internal order have accidentally been maintained in the default account assignment (OKB9).
- D. The field "order" has accidentally been maintained in the master of the respective cost elements (tab "default account assignment").

Correct Answer: B

QUESTION 4

Which of the following statements are correct with reference to activity type? (Choose two.)

- A. It classifies the specific activities provided by a cost center along cost allocation line.
- B. It serves as tracing factor for this cost allocation.
- C. The system calculates the associated cost based on the activity price and generates a credit to the receiver and a debit to the sender for both the quantity and the costs.
- D. The internal activity allocation is carried out via primary cost elements, which are stored in master data of the activity type master record.

Correct Answer: AB

QUESTION 5

Why should you use extracts in Report Painter reports?

- A. To reduce runtime.
- B. For automatic data aggregation.
- C. To reduce use of space in the database.
- D. For automatic updates when new postings are added.

Correct Answer: A
