**QUESTION 4**

An enterprise based in the US produces an end product that is used with the unit of measure "pound" (LB). The material is now to be marketed in the EU. A prerequisite for this is that the material can be sold with the unit "kilogram" (KG).

What is the easiest way to fulfill this requirement?

A. Define a unit of measure group that converts pounds to kilograms in the basic data customizing and assign it to the material master on basic data view 1.

B. Add a conversion factor for converting pounds to kilograms on basic data view 1 in the material master.

C. Create a new material with a reference to the original material and assign the metric unit of measure to the new material master.

D. There is no need to take any action. In this scenario, the conversion of units of measurements is done automatically.

Correct Answer: D

**QUESTION 5**

In which of the following objects can you activate backflushing of components if you want to use this functionality during order confirmation? (Choose three.)

A. Work Center

B. Production Scheduling Profile
