QUESTION 1

How would a global organization benefit from managing their data with Cloud Spanner?

- A. Cloud Spanner is optimized for cold storage
- B. Cloud Spanner replicates data across regions in real time
- C. Cloud Spanner is optimized to ingest unstructured data
- D. Cloud Spanner visualizes and analyzes data in real time

Correct Answer: B

Explanation: Spanner is Google's scalable, multi-version, globally-distributed, and synchronously-replicated database.

QUESTION 2

Your organization needs to ensure that the Google Cloud resources of each of your departments are segregated from one another. Each department has several environments of its own: development, testing, and production. Which strategy should your organization choose?

- A. Create a project per department, and create a folder per environment in each project.
- B. Create a folder per department, and create a project per environment in each folder.
- C. Create a Cloud Identity domain per department, and create a project per environment in each domain.
- D. Create a Cloud Identity domain per environment, and create a project per department in each domain.

Correct Answer: B

Folders are nodes in the [Cloud Platform Resource Hierarchy](#). A folder can contain projects, other folders, or a combination of both. Organizations can use folders to group projects under the organization node in a hierarchy. For example, your organization might contain multiple departments, each with its own set of Google Cloud resources. Folders allow you to group these resources on a per-department basis. Folders are used to group resources that share common IAM policies. While a folder can contain multiple folders or resources, a given folder or resource can have exactly one parent.

Text

```
# Template for new folder & new project

folder_resource = {
  'name': 'new-folder',
  'type': 'gcp-types/cloudresourcemanager-v2:folders',
  'properties': {
    'parent': 'organizations/999999',
    'displayName': 'new-folder'
  }
}

project_resource = {
  'name': 'new-project',
  'type': 'clouresourcemanager.v1.project',
  'metadata': { 'dependsOn': ['new-folder'] },
  'properties': {
    'name': 'new-project',
    'parent': {
      'type': 'folder',
      # HERE it is -- the problem!
      'id': '${ref.new-folder.name}'
    }
  }
}

return { 'resources': [folder_resource, project_resource] }
```

QUESTION 3

Your organization is building an application running in Google Cloud. Currently, software builds, tests, and regular deployments are done manually, but you want to reduce work for the team. Your organization wants to use Google Cloud managed solutions to automate your build, testing, and deployment process.

Which Google Cloud product or feature should your organization use?

- A. Cloud Scheduler
- B. Cloud Code
- C. Cloud Build
- D. Cloud Deployment Manager

Correct Answer: C

Deploy your application to App Engine using the gcloud app deploy command. This command automatically builds a container image by using the Cloud Build service and then deploys that image to the App Engine flexible environment. QUESTION 4

What cloud deployment model is generally deployed between organizations such as non-profits, hospitals or even enterprises that share similar requirements or interests?

- A. Hybrid
- B. Community
- C. Private
- D. Public

Correct Answer: B

Explanation: Community Cloud ?The cloud infrastructure is planned for selective use by a particular community of consumers from organizations that have mutual interests like security needs, policy, and compliance considerations.

QUESTION 5

An organization delivers a proactive healthcare service. They want to efficiently and automatically collect patient data. What should the organization encourage the patients to do?

- A. Use at-home health screening devices and then upload their health data daily
- B. Wear Internet of Things (IoT) devices that upload their health data in real time
- C. Self-assess their health data and then document and upload it in real time
- D. Visit a nurse who will use Internet of Things (IoT) devices to collect and upload their health data

Correct Answer: B
