

CPSA-FL^{Q&As}

ISAQB Certified Professional for Software Architecture - Foundation Level (CPSA-FL)

Pass ISQI CPSA-FL Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass2lead.com/cpsa-fl.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by ISQI Official Exam Center

- ⚙️ **Instant Download** After Purchase
- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

QUESTION 1

Which four of the following items can be building blocks of a software architecture? (Choose four.)

- A. an algorithm
- B. a component
- C. a test harness
- D. a class
- E. a processor
- F. a method/procedure/function/operation
- G. a local variable
- H. a package

Correct Answer: ABDH

QUESTION 2

Which of the following statements regarding iterative and incremental design are correct? Please name the three statements that fit the best. (Choose three.)

- A. Iterations help to deal with uncertainties.
- B. The iterative approach helps to detect design problems at an earlier stage.
- C. If the incremental approach is used, risks are detected at a later stage.
- D. Iterative design leads to project delays.
- E. If iterative design is used; the customer will be less involved.
- F. If incremental design is used; key functionality is considered as early as possible.

Correct Answer: ABF

QUESTION 3

Which of the following statements apply to design patterns? (Choose two.)

- A. Design patterns are not invented but discovered.
- B. Design patterns should always be described alongside the problem they are supposed to solve.
- C. Design patterns are formally defined and can thus be proven to be correct.

D. The number of design patterns used is proportional to the software architecture's quality.

Correct Answer: AB

QUESTION 4

Which of the following statements about (crosscutting) concepts are most appropriate? (Select four.)

- A. The definition of appropriate concepts ensures the conceptual integrity of the architecture.
- B. Concepts are a means to increase consistency.
- C. For each quality goal there should be an explicitly documented concept.
- D. Uniform exception handling is most easily achieved when architects agree with developers upon a suitable concept prior to implementation.
- E. A concept might be implemented by a single building block.
- F. Uniform usage of concepts reduces coupling between building blocks.
- G. A concept can define constraints for the implementation of many building blocks.

Correct Answer: ABDG

QUESTION 5

HOTSPOT

In your project, three architects and seven developers are working on the documentation of the software architecture.

Which methods are appropriate in order to achieve a consistent and adequate documentation, and which are not? (Assign all answers.)

Hot Area:

appropriate	not appropriate	
<input type="radio"/>	<input type="radio"/>	A) The chief architect creates the documentation.
<input type="radio"/>	<input type="radio"/>	B) Identical templates are used for the documentation.
<input type="radio"/>	<input type="radio"/>	C) All parts of the architecture documentation are automatically extracted from the source code.

Correct Answer:

appropriate

not appropriate

A) The chief architect creates the documentation.

B) Identical templates are used for the documentation.

C) All parts of the architecture documentation are automatically extracted from the source code.
