QUESTION 1

Given: You view a protocol analyzer capture decode with the following protocol frames listed in the following order (excluding the ACK frames):

1) 802.11 Probe Request and 802.11 Probe Response 2) 802.11 Auth and another 802.11 Auth 2) 802.11 Assoc Req and 802.11 Assoc Rsp 4) EAPOL-Start 5) EAP Request and EAP Response 6) EAP Request and EAP Response 7) EAP Request and EAP Response 8) EAP Request and EAP Response 9) EAP Request and EAP Response 10) EAP Success 19) EAPOL-Key (4 frames in a row)

What are you seeing in the capture file? (Choose 4)

A. WPA2-Enterprise authentication

B. WPA2-Personal authentication

C. 802.11 Open System authentication

D. 802.1X with Dynamic WEP

E. Wi-Fi Protected Setup with PIN

F. Active Scanning

G. 4-Way Handshake

Correct Answer: ACFG

QUESTION 2

Given: An 802.1X/EAP implementation includes an Active Directory domain controller running Windows Server 2012 and an AP from a major vendor. A Linux server is running RADIUS and it queries the domain controller for user credentials. A Windows client is accessing the network.

What device functions as the EAP Supplicant?

A. Linux server

B. Windows client

C. Access point

D. Windows server

E. An unlisted switch

F. An unlisted WLAN controller

Correct Answer: B

QUESTION 3

![Pass2Lead](https://Pass2Lead.com)
Given: ABC Corporation\\'s 802.11 WLAN is comprised of a redundant WLAN controller pair (N+1) and 30 access points implemented in 2004. ABC implemented WEP encryption with IPSec VPN technology to secure their wireless communication because it was the strongest security solution available at the time it was implemented. IT management has decided to upgrade the WLAN infrastructure and implement Voice over Wi-Fi and is concerned with security because most Voice over Wi-Fi phones do not support IPSec.

As the wireless network administrator, what new security solution would be best for protecting ABC\\'s data?

A. Migrate corporate data clients to WPA-Enterprise and segment Voice over Wi-Fi phones by assigning them to a different frequency band.

B. Migrate corporate data and Voice over Wi-Fi devices to WPA2-Enterprise with fast secure roaming support, and segment Voice over Wi-Fi data on a separate VLAN.

C. Migrate to a multi-factor security solution to replace IPSec; use WEP with MAC filtering, SSID hiding, stateful packet inspection, and VLAN segmentation.

D. Migrate all 802.11 data devices to WPA-Personal, and implement a secure DHCP server to allocate addresses from a segmented subnet for the Voice over Wi-Fi phones.

Correct Answer: B

QUESTION 4

Role-Based Access Control (RBAC) allows a WLAN administrator to perform what network function?

A. Minimize traffic load on an AP by requiring mandatory admission control for use of the Voice access category.

B. Allow access to specific files and applications based on the user\\'s WMM access category.

C. Provide two or more user groups connected to the same SSID with different levels of network privileges.

D. Allow simultaneous support for multiple EAP types on a single access point.

Correct Answer: C

QUESTION 5

Given: You must implement 7 APs for a branch office location in your organization. All APs will be autonomous and provide the same two SSIDs (CORP1879 and Guest).

Because each AP is managed directly through a web-based interface, what must be changed on every AP before enabling the WLANs to ensure proper staging procedures are followed?

A. Fragmentation threshold

B. Administrative password

C. Output power

D. Cell radius

Correct Answer: B
