QUESTION 1

What attack cannot be detected by a Wireless Intrusion Prevention System (WIPS)?

- A. MAC Spoofing
- B. Eavesdropping
- C. Hot-spotter
- D. Soft AP
- E. Deauthentication flood
- F. EAP flood

Correct Answer: B

QUESTION 2

Given: A network security auditor is preparing to perform a comprehensive assessment of an 802.11ac network's security.

What task should be performed at the beginning of the audit to maximize the auditor's ability to expose network vulnerabilities?

- A. Identify the IP subnet information for each network segment.
- B. Identify the manufacturer of the wireless intrusion prevention system.
- C. Identify the skill level of the wireless network security administrator(s).
- D. Identify the manufacturer of the wireless infrastructure hardware.
- E. Identify the wireless security solution(s) currently in use.

Correct Answer: E

QUESTION 3

Given: You have a Windows laptop computer with an integrated, dual-band, Wi-Fi compliant adapter. Your laptop computer has protocol analyzer software installed that is capable of capturing and decoding 802.11ac data.

What statement best describes the likely ability to capture 802.11ac frames for security testing purposes?

- A. All integrated 802.11ac adapters will work with most protocol analyzers for frame capture, including the Radio Tap Header.
- B. Integrated 802.11ac adapters are not typically compatible with protocol analyzers in Windows laptops. It is often best to use a USB adapter or carefully select a laptop with an integrated adapter that will work.

- C. Laptops cannot be used to capture 802.11ac frames because they do not support MU-MIMO.
- D. Only Wireshark can be used to capture 802.11ac frames as no other protocol analyzer has implemented the proper frame decodes.
- E. The only method available to capture 802.11ac frames is to perform a remote capture with a compatible access point.

Correct Answer: B

QUESTION 4

Your organization required compliance reporting and forensics features in relation to the 802.11ac WLAN they have recently installed. These features are not built into the management system provided by the WLAN vendor. The existing WLAN is managed through a centralized management console provided by the AP vendor with distributed APs and multiple WLAN controllers configured through this console.

What kind of system should be installed to provide the required compliance reporting and forensics features?

- A. WNMS
- B. WIPS overlay
- C. WIPS integrated
- D. Cloud management platform

Correct Answer: B

QUESTION 5

Given: ABC Company has 20 employees and only needs one access point to cover their entire facility. Ten of ABC Company's employees have laptops with radio cards capable of only WPA security. The other ten employees have laptops with radio cards capable of WPA2 security. The network administrator wishes to secure all wireless communications (broadcast and unicast) for each laptop with its strongest supported security mechanism, but does not wish to implement a RADIUS/AAA server due to complexity.

What security implementation will allow the network administrator to achieve this goal?

- A. Implement an SSID with WPA2-Personal that allows both AES-CCMP and TKIP clients to connect.
- B. Implement an SSID with WPA-Personal that allows both AES-CCMP and TKIP clients to connect.
- C. Implement two separate SSIDs on the AP--one for WPA-Personal using TKIP and one for WPA2Personal using AES-CCMP.
- D. Implement an SSID with WPA2-Personal that sends all broadcast traffic using AES-CCMP and unicast traffic using either TKIP or AES-CCMP.

Correct Answer: C
