QUESTION 1

As part of addressing General Data Protection Regulation (GDPR) requirements, Universal Containers (UC) plans to implement a data classification policy for all of its internal systems that store customer information including Salesforce.

What should a data architect recommend so that UC can easily classify customer information maintained in Salesforce under both standard and custom objects?

- A. Use App Exchange products to classify fields based on policy.
- B. Use data classification metadata fields available in field definition.
- C. Create a custom picklist field to capture classification of information on customer.
- D. Build reports for customer information and validate.

Correct Answer: B

QUESTION 2

A customer wants to maintain geographic location information including latitude and longitude in a custom object.

What would a data architect recommend to satisfy this requirement?

- A. Create formula fields with geolocation function for this requirement.
- B. Create custom fields to maintain latitude and longitude information
- C. Create a geolocation custom field to maintain this requirement
- D. Recommend app exchange packages to support this requirement.

Correct Answer: C

QUESTION 3

Universal Container (UC) is migrating data from legacy system to Salesforce. UC would like to preserve the following information on records being migrated:

1.

Date time stamps for created date and last modified date.

2.

Ownership of records belonging to inactive users being migrated to Salesforce.

Which two solutions should a data architect recommend to preserve date timestamps and ownership on records? (Choose two.)

- A. Log a case with SF to update these fields
- B. Enable update records with Inactive Owners Permission
- C. Enable Set Audit fields upon Record Creation Permission
- D. Enable modify all and view all permission.

Correct Answer: BC

QUESTION 4

Ursa Major Solar's legacy system has a quarterly accounts receivable report that compiles data from the following:

1.
Accounts
2.
Contacts
3.
Opportunities
4.
Orders
5.
Order Line Items

Which issue will an architect have when implementing this in Salesforce?

- A. Custom report types CANNOT contain Opportunity data.
- B. Salesforce does NOT support Orders or Order Line Items.
- C. Salesforce does NOT allow more than four objects in a single report type.
- D. A report CANNOT contain data from Accounts and Contacts.

Correct Answer: C

QUESTION 5

Universal Containers (UC) has a requirement to create an Account plan object that is related to the Account object. Each Account plan needs to have an Account object, but the accessibility requirement of the Account plan is different from the Account object. What should an Architect recommend?

- A. Create a custom account plan object as detail with Account as master in a master-detail relationship.
- B. Create a custom account plan object as detail with Account as master with additional sharing rules to allow access.
- C. Create an account plan object with a lookup relationship to Account without any validation rules to enforce the Account association.
- D. Create an account plan object with a lookup relationship to Account with validation rules to enforce the Account association.

Correct Answer: D
