QUESTION 1

Two RDF groups from two PowerMax arrays have been added to a Consistency Group SRDF/A Multi-Session Consistency has been enabled for the Consistency Group. The RDF daemon has been started on a single host that has access to both the PowerMax arrays

What will happen if the host becomes unavailable?

- A. Cycle switching will stop
- B. RDF links will be suspended immediately
- C. SRDF pair state will become Partitioned
- D. SRDF mode will change to Adaptive Copy Disk

Correct Answer: C

QUESTION 2

```
C:\>symsnapvx -sid [REDACTED] relink -sg snapvx_sq -snapshot name backup -gen 1 -lsg snapvx tgt_sq
Polling for Relink.....Started.
Polling for Relink.....Done.

Relink operation successfully executed for the storage group snapvx_sq

C:\>symsnapvx -sid [REDACTED] list -sg snapvx_sq -detail -linked

Storage Group (SG) Name      : snapvx_sq
SG's Symmetrix ID           : [REDACTED] (Microcode Version: 5978)

-----
Sym      Link  Flgs
Dev      Dev  FCMSD Snapshot Timestamp      Remaining  Done
                               Snapshot Timestamp      (Tracks)  (%)
-----
000D1 backup                1 000DD ...X. Wed Nov 28 14:24:41 2018      81930    0
-----
                                         81930
```

Which activity needs to be performed prior to the operations shown in the exhibit?

- A. TTL setting should be changed
- B. Snapshot should be terminated
- C. Target volumes should be unmounted
- D. Target volumes should be unmapped

Correct Answer: A

QUESTION 3

DRAG DROP

An RDF group on a VMAX3 array is being replicated in SRDF/A mode to a remote VMAX3 array To accommodate application growth a new R1 device needs to be added to the RDF group SRDF/A consistency of the existing devices in the

RDF group should be maintained when the new device is added.

What is the correct sequence of steps for adding the new R1 device and making it available for application use?

Select and Place:

| | |
|--|--------|
| Suspend the links for the new RDF device pair | STEP 1 |
| Wait until the Consistency Exempt attribute is cleared and the pair state is Consistent | STEP 2 |
| Create a new RDF device pair in a temporary RDF group and wait for the pair state to become Synchronized | STEP 3 |
| Move the new RDF device pair to the RDF/A group using Consistency Exempt | STEP 4 |
| Resume the links for the new RDF device pair | STEP 5 |

Correct Answer:

| | |
|--|--|
| | Wait until the Consistency Exempt attribute is cleared and the pair state is Consistent |
| | Create a new RDF device pair in a temporary RDF group and wait for the pair state to become Synchronized |
| | Suspend the links for the new RDF device pair |
| | Resume the links for the new RDF device pair |
| | Move the new RDF device pair to the RDF/A group using Consistency Exempt |

QUESTION 4

Which units of measure are used to specify the size type when creating volumes in Unisphere?

- A. Cylinders, MB, GB, TB
- B. MB and GB only
- C. MB, TB, PB
- D. Cylinders, GB, TB, PB

Correct Answer: D

QUESTION 5

An administrator is managing two PowerMax arrays that are located in two different data centers. The data centers are 550 km apart and are connected by a high bandwidth network link. The administrator wants to replicate data between the two arrays and achieve the lowest RPO

When using SRDF, which mode meets this requirement?

- A. Asynchronous
- B. Adaptive Copy
- C. Metro
- D. Synchronous

Correct Answer: C
