QUESTION 1

A cloud architect is designing a hybrid cloud for an organization. A requirement for this environment is that the private cloud user credential be trusted by both cloud provisioning APIs. Which type of authentication will meet this requirement?

- A. Multi-factor
- B. Federated
- C. Private-key
- D. Shared-key

Correct Answer: B

QUESTION 2

Which design consideration applies to object storage?

- A. Multi-tenancy is supported through file and directory permissions
- B. It is best suited for high performance and low latency applications
- C. A RAID controller on the host computer handles redundancy
- D. A common authentication mechanism is accessible by all tenants

Correct Answer: B

QUESTION 3

What is the benefit of Hot Spare disks?

- A. Enable efficient use of SSDs and NL SAS drive technologies
- B. Provide space-optimal data redundancy against multiple drive failures
- C. Handle any disk failure by distributing data over multiple drives
- D. Replace failed drives by taking the identity of the failed drive

Correct Answer: D

QUESTION 4

SPECIAL INSTRUCTIONS REMINDER

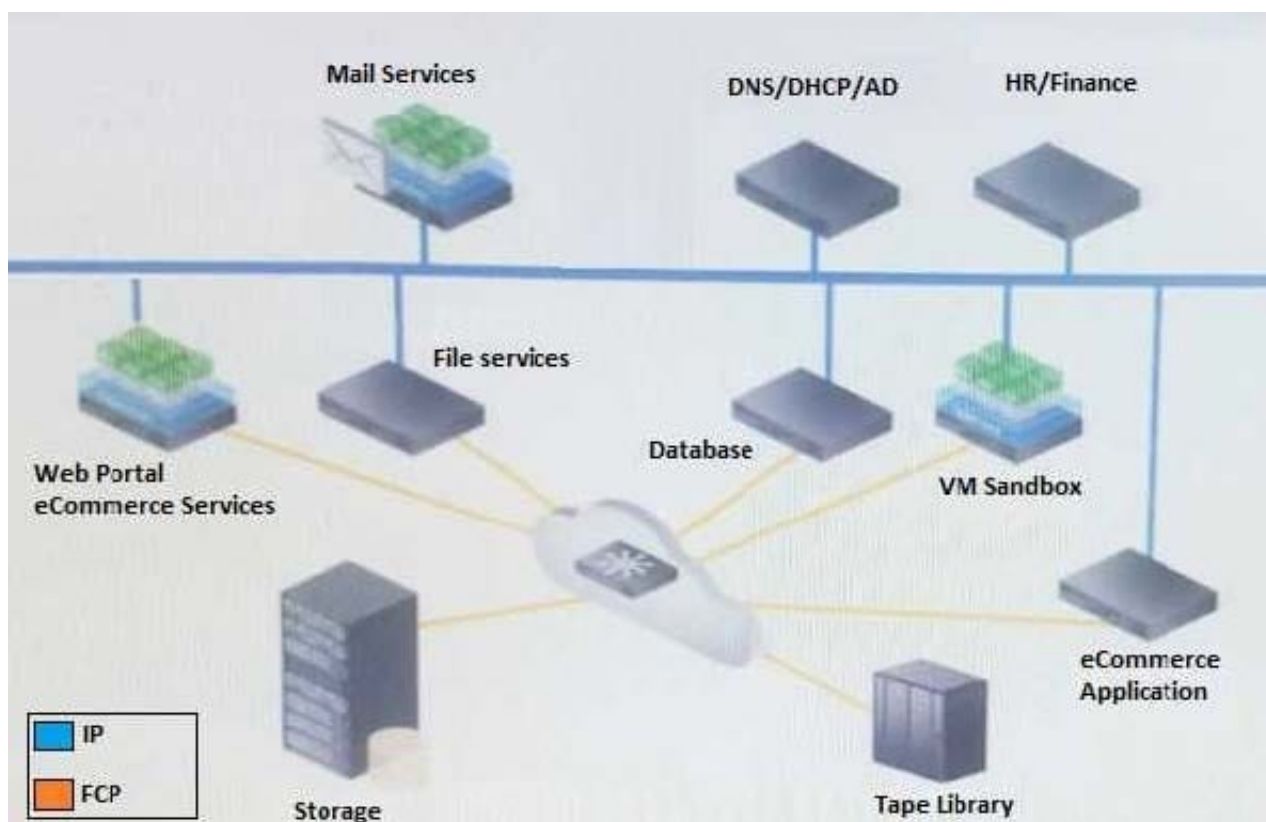

The remaining questions are associated with two cases. Each case has an introductory, descriptive passage (case text) that describes background information and requirements for a specific cloud based design. And each case has a set of six related, randomized questions. You will need to read the case text in order to answer the related questions correctly.

Given that there are two cases with six scored questions each, the total number of case-based scored questions is 12.

When you display each questions you can easily review the related case text in a pop-up window by clicking on the "Case" icon (shown below)

Case 4

Refer to the exhibit.

Your company is currently using a traditional SAN storage network. The server infrastructure is partially virtualized. There is a public cloud in place that is used to test development and application migration to cloud.

Business requirements:

Consolidate the network, storage, and compute resources Simplify network management and storage provisioning Maintain application performance

Need to share resources to reduce cost and improve efficiency Other considerations:

Monitoring of protection SLAs

All transactions must be logged for auditing review

Users are validated using internal credentials

Refer to Case 4.

You must design the solution to enable external access to the eCommerce application using a Public cloud.

The development team wants to ensure that the application has a known performance profile. Which consideration offers best practices to address this concern?

- A. Automation Management
- B. Multicloud Compliance
- C. Interoperability
- D. Physical Server Consistency

Correct Answer: A

QUESTION 5

DRAG DROP

Match each tool with its associated description.

Select and Place:

TOOL:	DESCRIPTION:
top	Dell EMC tool that captures storage system data plus enabled software
SP Collect	Tool that captures processor, memory, and storage information for Windows systems
AWR	Linux tool that captures real-time system and performance data
Performance Monitor	Embedded tool that captures Oracle resource consumption

Correct Answer:

TOOL:

DESCRIPTION:

SP Collect
Performance Monitor
top
AWR
