QUESTION 1

A customer has two new Dell EMC Integrated Data Protection Appliances and wants to back up to both appliances and replicate bidirectionally. The data centers are connected by a WAN link that will also be used by other mission critical applications. To prepare for replication, the customer wants to co-locate both appliances at one data center and configure replication locally to minimize the initial replication traffic.

After the initial synchronization, one unit will be relocated and the network reconfigured at the disaster recovery data center.

What is mandatory for this solution to be deployed?

A. IDPA v2.2

B. Segregated replication interface

C. Approved RPQ

D. Minimum 1000 Mb WAN link

Correct Answer: B

QUESTION 2

A customer wants to ingest their backups to a Dell EMC Data Domain using Avamar at the maximum network throughput that the system supports.

What should be used to achieve this requirement?

A. Data Domain VTL

B. Data Domain Boost over FC

C. Data Domain Dynamic Interface Groups

D. Data Domain with LACP aggregation

Correct Answer: C

QUESTION 3

A customer wants a technology refresh of their Dell EMC NetWorker environment. They want the ability to backup to disk devices. In addition, they want to write all backup-to-disk devices with eight savesets simultaneously. After reviewing the current environment, you discover that only two drives are used.

Which setting should be changed so that all drives are used simultaneously?

A. Max sessions

B. Device parallelism

C. Target sessions

D. Client parallelism

Correct Answer: A

QUESTION 4

A customer plans to integrate a new Dell EMC Data Domain system into their existing backup environment.

Which protocols are supported over Ethernet for the backup data?

A. CIFS, NFS, and DD Boost

B. CIFS, HTTP, and VTL

C. NDMP, VTL, and FTP

D. CIFS, VTL, and DD Boost

Correct Answer: A

QUESTION 5

What is the approximate deduplication rate for a Dell EMC Avamar server across all clients?

A. 60% for file system data and 30% for database data

B. 70% for file system data and 35% for database data

C. 80% for file system data and 20% for database data

D. 90% for file system data and 10% for database data

Correct Answer: C
