QUESTION 1

When a member firm buys or sells securities directly as principal with a public customer, it is acting as:

- A. a dealer
- B. a broker
- C. an agent
- D. none of the above

Correct Answer: A

a dealer. When a firm does business directly with a customer, it is acting as a dealer. When it represents a customer, it is acting as a broker.

QUESTION 2

Bubba owns a perpetual warrant to buy one share of Internet Corporation common stock at \$30. Internet Corporation stock is trading at 41.50 and is ex-dividend today at \$0.75. What is the market value of Bubba's warrant?

- A. 5.75
- B. 5.62
- C. 5.38
- D. cannot be determined from this information

Correct Answer: D

cannot be determined. Bubba can put away the calculator. The warrant is "perpetual" so the value is not determinable from today's price of the common stock.

QUESTION 3

For an FINRA member firm to exercise discretionary power in any customer account requires written authorization by that customer except when:

- A. the customer is a spouse of the registered representative
- B. the customer has given an oral approval after the transaction
- C. only time and price of execution are involved
- D. both B and C

Correct Answer: C

only time and price of execution are involved. The only exception to the discretionary rule is when the customer gives

discretion regarding time and price of execution.

QUESTION 4

Bubba sells 100 shares of XYZ short at \$58 and buys 1 XYZ Mar 60 Call at \$3. What is the customer's maximum loss?

- A. \$500
- B. \$100
- C. unlimited
- D. \$5,500

Correct Answer: A

\$500. Bubba sold short at \$58. The call with a strike price of 60, gives him the right to buy back the stock at \$60. If the stock rises, the call can be used to limit the loss to 2 points. Bubba can lose \$200 on the stock. Bubba also paid a \$300 premium. Loss potential is \$500.

QUESTION 5

Bubba has no existing positions in his account and writes 1 XYZ July 60 put and 1 XYZ July 60 call. What is this position called?

- A. short combination
- B. long combination
- C. long straddle
- D. short straddle

Correct Answer: D

short straddle. A straddle is a put and call on the same stock with the same strike price and expiration date.
