QUESTION 1

A circle is inscribed in a regular hexagon that is inscribed in a circle. What is the ratio of the area of the smaller circle to the area of the larger circle?

- A. $\frac{1}{2}$
- B. $\frac{\sqrt{2}}{2}$
- C. $\frac{3}{4}$
- D. $\frac{\sqrt{3}}{2}$
- E. $\frac{\sqrt{3}}{\sqrt{2}}$

A. Option A

B. Option B

C. Option C

D. Option D

E. Option E

Correct Answer: C

QUESTION 2

Discussions of the collapse of the lowland Maya are not new. However, it might be better to say that Maya civilization as a whole did not collapse, although many zones did experience profound change. Because societies are not bounded, unitary entities, collapses are rarely total, and continuity is a normal part of collapse. At the end of the Classic period [200-900 C.E.], the institution of divine kingship and many of the well-known markers of elite culture such as carved stelae [slabs erected for funerals or commemorative purposes] and hieroglyphic polychromes [multicolored artistic pottery] ended, but Maya civilization continued in modified form with many important features intact (e.g., literacy, war, art, the production of fine ceramics). In some cases large buildings were constructed in the Postclassic period [900-1512 C.E.],

but the transition to the Early Postclassic [900-1200 C.E.] era is distinctive for a decrease in elite goods and contexts. The variability in artifact changes during the Terminal Classic [800-900 C.E.] and into the Postclassic, even within artifact classes (e.g., fine versus unslipped ceramics), suggests weaker centralized control than during the Classic period. Site abandonments in the Terminal Classic indicate the collapse of the functional ability of Maya states, but sites that survived show that Maya civilization continued albeit without divine kingship and much of the spectacle around it. The passage suggests which of the following about Maya living after the Terminal Classic in "sites that survived"?

- A. Their customs were identical to those of their ancestors.
- B. Their pottery was totally utilitarian in nature.
- C. They no longer created carved stelae.
- D. They stopped erecting large buildings.
- E. They did not use written language.

Correct Answer: C

QUESTION 3

Mathematicians have sometimes acknowledged that _____ is a requirement for creativity: for example, Poincaré described explicitly a time when he experienced an insight after an incubation period, a period during which the unconscious mind was at work.

- A. intelligence
- B. preparation
- C. motivation assistance
- D. collaboration

Correct Answer: C

QUESTION 4

x is a positive integer and z is an odd integer greater than 1.

Quantity A

The remainder when $(x + z)(z - 1)$ is divided by 2

Quantity B

0

- A. Quantity A is greater.

- B. Quantity B is greater.
- C. The two quantities are equal.
- D. The relationship cannot be determined from the information given.

Correct Answer: C

QUESTION 5

The lengths of the sides of triangle RST are 3, 4, and y . Which of the following inequalities specifies those values of y for which each angle measure of triangle RST is less than 90° ?

- A. $1 < y < 4$
- B. $1 < y < 5$
- C. $2 < y < 5$
- D. $\sqrt{7} < y < 5$
- E. $\sqrt{7} < y < 6$

- A. Option A
- B. Option B
- C. Option C
- D. Option D
- E. Option E

Correct Answer: C
