# H13-321<sup>Q&As</sup>

HCIP-AI-EI Developer V2.0

# Pass Huawei H13-321 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

**https://www.pass2lead.com/h13-321.html**

**100% Passing Guarantee**
**100% Money Back Assurance**

Following Questions and Answers are all new published by Huawei Official Exam Center

⚙ **Instant Download** After Purchase

⚙ **100% Money Back** Guarantee

⚙ **365 Days** Free Update

⚙ **800,000+** Satisfied Customers

**QUESTION 1**

The LDA algorithm assumes that the prior distribution of topics in documents and the prior distribution of words in topics follow the Dirichlet distribution.

A. TRUE

B. FALSE

Correct Answer: A

**QUESTION 2**

What are the main functions of MoXing? (Single choice)

A. Deep learning tool library developed by Huawei

B. Deep learning engine developed by Huawei

C. Package and acceleration of distributed training acceleration framework and API interface of deep learning engines such as TensorFlow

D. Simple encapsulation of API interfaces for deep learning engines such as TensorFlow

Correct Answer: C

**QUESTION 3**

Taking pictures indoors on a cloudy day, the light is not good, what is the shape of the brightness histogram of the photo? (Single choice)

A. There is a peak on each side

B. The left side is relatively flat, and the right side has a crest

C. The waveform is uniform without peaks

D. The right side is relatively flat and the left side has a crest

Correct Answer: D

**QUESTION 4**

Which network structure does the convolutional neural network include?

A. Output layer

B. Convolutional layer

C. Fully connected layer

D. Pooling layer

Correct Answer: BCD

**QUESTION 5**

What is the correct description of the nature of the probability density function?

A. The integral of the probability density function in positive and negative infinity is 0

B. The value of the probability density function is greater than or equal to 0

C. The value of the probability density function can take any value

D. The integral of the probability density function at positive and negative infinity is 1

Correct Answer: AD
