QUESTION 1

A customer's business needs 24/7 uptime and highest data availability. In the past, the customer has experienced revenue loss from several outages during firmware upgrade processes with non-HPE products due to temporary loss of access to disk enclosures. There is a need for 80 TB of Tier-0 storage. You propose cage availability in the new design, using an HPE 3PAR StoreServ 2-node system containing

80.92 TB cMLC SSD drives.

When following HPE best practices, how many additional enclosures should be included in the system?

- A. 0
- B. 1
- C. 2
- D. 3

Correct Answer: D

QUESTION 2

Which benefit of the REST API when compared to other well-known interface methods should be presented to a customer to correctly position HPE OneView?

- A. REST API offers integrated JavaScript Object Notation (JSON) translation
- B. No state change message bus is needed to communication with HPE OneView
- C. REST API has lighter bandwidth requirements
- D. The code is compatible with all Simple Object Access Protocol (SOAP) scripts

Correct Answer: C

QUESTION 3

Your customer is concerned about downtime during storage system upgrades.

Which method of technology addresses this concern when using an HPE 3PAR StoreServ solution?

- A. Persistent Peers
- B. Persistent Cache
- C. Persistent Ports
- D. Persistent RAID

Correct Answer: C

QUESTION 4

As part of solution tuning, you want to add online, application-consistent snapshots to a customer's environment.

Which tasks must be performed? (Select two.)

- A. Delete the snapshot
- B. Stop the VM
- C. Release file locks
- D. Flush the buffers
- E. Quiesce the file system

Correct Answer: DE

QUESTION 5

You are proposing an HPE 3PAR StoreServ solution to a new customer who has never owned HPE Storage products. The customer is interested in migrating their data from the existing solution with minimal service impact.

Which HPE 3PAR StoreServ feature option should you introduce to this customer?

- A. attaching an HPE 3PAR StoreServ management application to other vendors' storage systems
- B. moving data off other vendor's arrays onto HPE 3PAR StoreServ arrays with online import
- C. importing space-efficient snapshots created on other arrays for backup purposes
- D. re-purposing disk drives from other arrays

Correct Answer: A
