**QUESTION 1**

Refer to the exhibit.

The exhibit shows output from a Mobility Master (MM) dashboard. What is a valid reason for the administrator to click the akamai square under applications?

- A. to create filter rules in order to control wireless user access to this application
- B. to download a report about the usage of this application over time
- C. to see more details about this application, such as a list of aggregated sessions
- D. to see the break down for only roles, destinations, WLANs and devices that use this application

Correct Answer: D

**QUESTION 2**

A company wants to provide wireless access for guests with their Aruba solution. Which configuration feature requires the customer to purchase PEFNG licenses?

- A. redirection of guests to an external captive portal
- B. provision of DHCP services to unauthenticated guests
- C. addition of custom rules to control access for authenticated guests
- D. customization of the internal captive portal login page

Correct Answer: C

**QUESTION 3**

A WLAN in an Aruba Mobility Master (MM)-based solution uses WPA2-Enterprise security. This WLAN currently authenticates users to Active Directory (AD), and users log in with their Windows domain credentials. Network administrators now want to authenticate the Windows clients as well, based on the client Computer Names. What should the administrators do on MM to achieve this goal?

- A. Set up Machine Authentication on the WLAN.
- B. Set up Mac Authentication on the WLAN.
- C. Bind individual Mobility Controllers (MCs) to AD at the device level.
- D. Import the computer names from AD to the MM internal database.

Correct Answer: A

---

**QUESTION 4**

An Aruba solution has a WLAN that uses WPA2-Enterprise security. How are encryption keys dynamically managed for the wireless users?

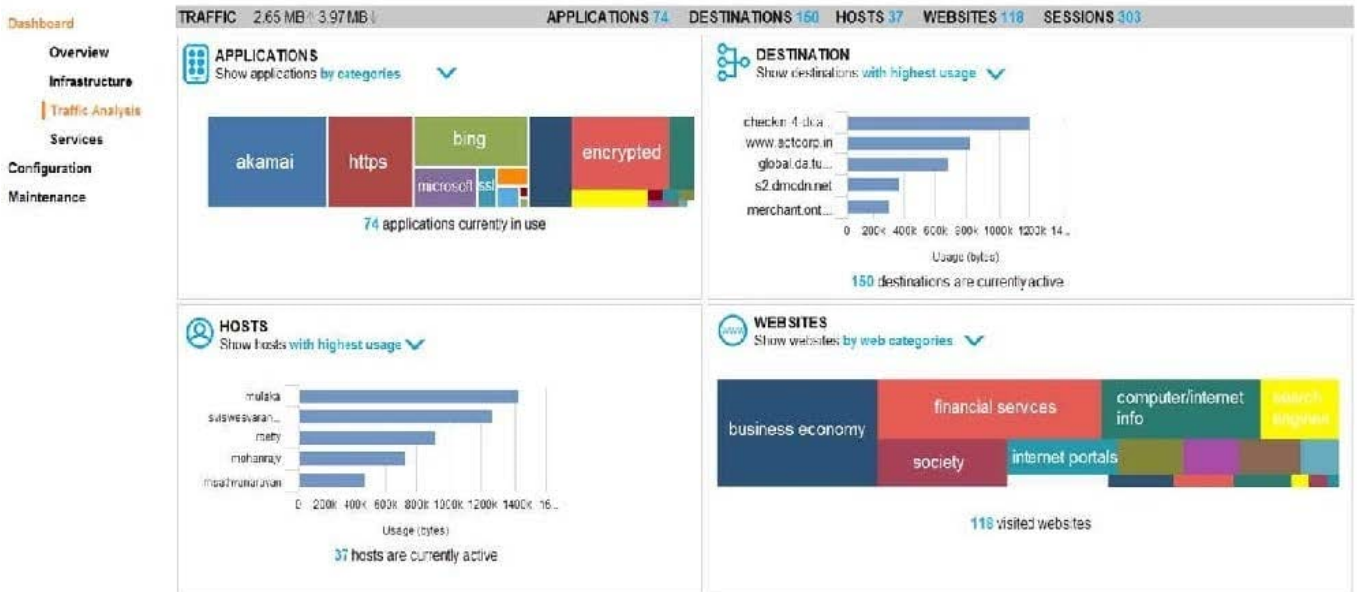

- A. The MM generates and distributes keys to clients and access points (APs).
- B. Administrators configure identical key strings on the Mobility Controllers (MCs) and wireless client 802.1X settings.
- C. Keys are generated and distributed securely during each wireless user authentication process.
- D. Keys are derived from the preshared key configured on the WLAN and on each wireless client.

Correct Answer: C

---

**QUESTION 5**

Refer to the exhibit.

The exhibit shows output from a Mobility Master (MM) dashboard. What is a valid reason for the administrator to click the akamai square under applications?

- A. to see the break down for only the roles, destinations, WLANs, and devices that use this application
- B. to download a report about the usage of this application over time
- C. to create filter rules in order to control wireless user access to this application
- D. to set up bandwidth rule in order to control wireless user access to this application

Correct Answer: A
