QUESTION 1

Universal Containers is creating a web application that will be secured by Salesforce Identity using the OAuth 2.0 Web Server Flow (uses the OAuth 2.0 authorization code grant type).

Which three OAuth concepts apply to this flow?

Choose 3 answers

- A. Verification URL
- B. Client Secret
- C. Access Token
- D. Scopes

Correct Answer: BCD

QUESTION 2

A real estate company wants to provide its customers a digital space to design their interior decoration options. To simplify the registration to gain access to the community site (built in Experience Cloud), the CTO has requested that the IT/ Development team provide the option for customers to use their existing social-media credentials to register and access.

The IT lead has approached the Salesforce Identity and Access Management (IAM) architect for technical direction on implementing the social sign-on (for Facebook, Twitter, and a new provider that supports standard OpenID Connect (OIDC)).

Which two recommendations should the Salesforce IAM architect make to the IT Lead?

Choose 2 answers

- A. Use declarative registration handler process builder/flow to create, update users and contacts.
- B. Authentication provider configuration is required each social sign-on providers; and enable Authentication providers in community.
- C. For supporting OIDC it is necessary to enable Security Assertion Markup Language (SAML) with Just-in-Time provisioning (JIT) and OAuth 2.0.
- D. Apex coding skills are needed for registration handler to create and update users.

Correct Answer: BD

QUESTION 3

Northern Trail Outfitters would like to use a portal built on Salesforce Experience Cloud for customer self-service.

Guests of the portal be able to self-register, but be unable to automatically be assigned to a contact record until verified.

External Identity licenses have been purchased for the project.

After registered guests complete an onboarding process, a flow will create the appropriate account and contact records for the user.

Which three steps should an identity architect follow to implement the outlined requirements?

Choose 3 answers

- A. Enable "Allow customers and partners to self-register".
- B. Select the "Configurable Self-Reg Page" option under Login and Registration.
- C. Set up an external login page and call Salesforce APIs for user creation.
- D. Customize the self-registration Apex handler to temporarily associate the user to a shared single contact record.
- E. Customize the self-registration Apex handler to create only the user record.

Correct Answer: ABE

QUESTION 4

After a recent audit, Universal Containers was advised to implement Two-factor Authentication for all of their critical systems, including Salesforce. Which two actions should UC consider to meet this requirement? Choose 2 answers

- A. Require users to provide their RSA token along with their credentials.
- B. Require users to supply their email and phone number, which gets validated.
- C. Require users to enter a second password after the first Authentication
- D. Require users to use a biometric reader as well as their password

Correct Answer: AD

QUESTION 5

Universal Containers want users to be able to log in to the Salesforce mobile app with their Active Directory password. Employees are unable to use mobile VPN.

Which two options should an identity architect recommend to meet the requirement?

Choose 2 answers

- A. Active Directory Password Sync Plugin
- B. Configure Cloud Provider Load Balancer
- C. Salesforce Trigger and Field on Contact Object

D. Salesforce Identity Connect

Correct Answer: AD
