QUESTION 1

Northern Trail Outfitters (NTO) wants its customers to use phone numbers to log in to their new digital portal, which was designed and built using Salesforce Experience Cloud. In order to access the portal, the user will need to do the following:

1.

 Enter a phone number and/or email address

2.

 Enter a verification code that is to be sent via email or text. What is the recommended approach to fulfill this requirement?

A. Create a Login Discovery page and provide a Login Discovery Handler Apex class.

B. Create a custom login page with an Apex controller. The controller has logic to send and verify the identity.

C. Create an Authentication provider and implement a self-registration handler class.

D. Create a custom login flow that uses an Apex controller to verify the phone numbers with the company\\'s verification service.

Correct Answer: A

QUESTION 2

Universal containers (UC) is successfully using Delegated Authentication for their salesforce users. The service supporting Delegated Authentication is written in Java. UC has a new CIO that is requiring all company Web services be RESRful and written in . NET. Which two considerations should the UC Architect provide to the new CIO? Choose 2 answers

A. Delegated Authentication will not work with a.net service.

B. Delegated Authentication will continue to work with rest services.

C. Delegated Authentication will continue to work with a.net service.

D. Delegated Authentication will not work with rest services.

Correct Answer: CD

QUESTION 3

A financial enterprise is planning to set up a user authentication mechanism to login to the Salesforce system. Due to regulatory requirements, the CIO of the company wants user administration, including passwords and authentication requests, to be managed by an external system that is only accessible via a SOAP webservice.
