QUESTION 1

Universal Containers (UC) has built a custom time tracking app for its employee. UC wants to leverage Salesforce Identity to control access to the custom app.

At a minimum, which Salesforce license is required to support this requirement?

- A. Identity Verification
- B. Identity Connect
- C. Identity Only
- D. External Identity

Correct Answer: C

QUESTION 2

Which two considerations should be made when implementing Delegated Authentication? Choose 2 answers

- A. The authentication web service can include custom attributes.
- B. It can be used to authenticate API clients and mobile apps.
- C. It requires trusted IP ranges at the User Profile level.
- D. Salesforce servers receive but do not validate a user's credentials.
- E. Just-in-time Provisioning can be configured for new users.

Correct Answer: BE

QUESTION 3

Universal Containers (UC) is building a custom employee (h) application on Amazon Web Services (AWS) and would like to store their users' credentials there. Users will also need access to Salesforce for internal operations. UC has tasked an identity architect with evaluating different solutions for authentication and authorization between AWS and Salesforce.

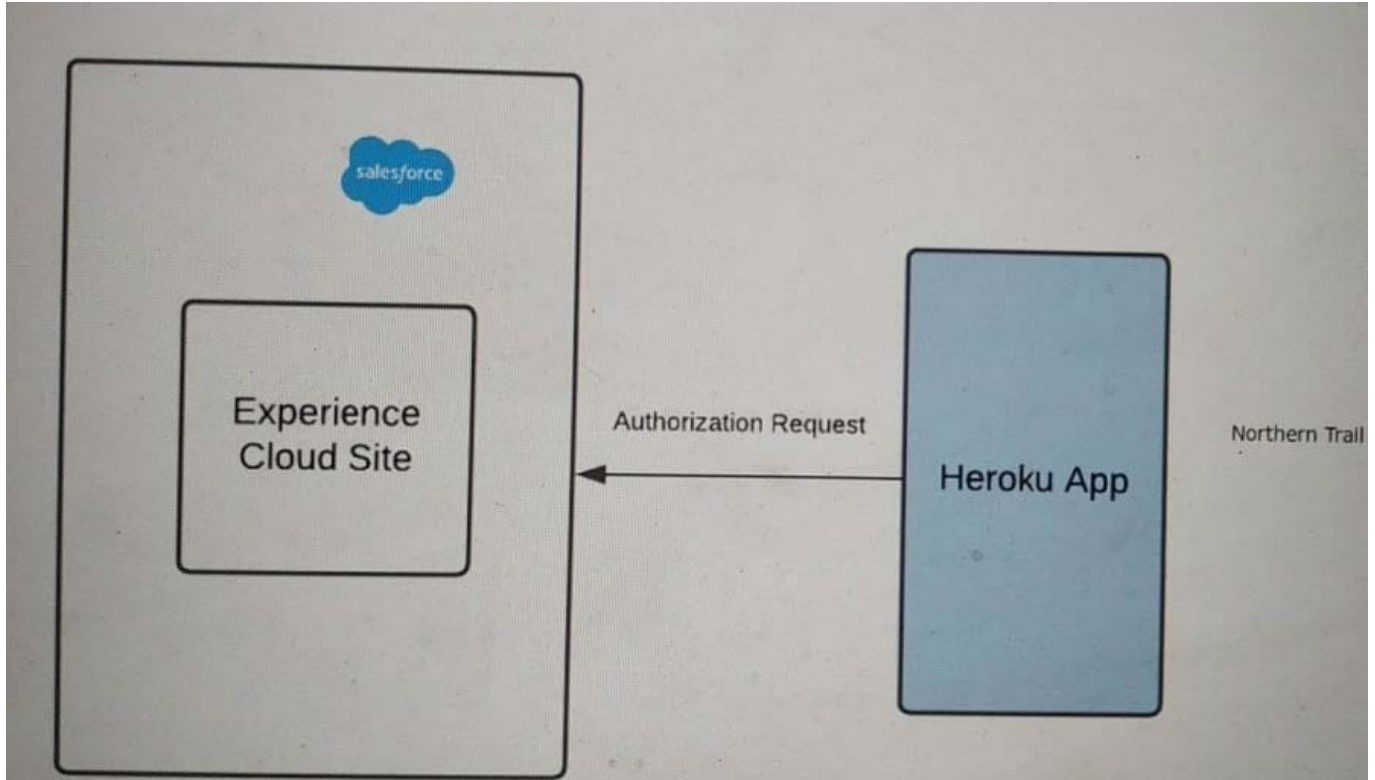

How should an identity architect configure AWS to authenticate and authorize Salesforce users?

- A. Configure the custom employee app as a connected app.
- B. Configure AWS as an OpenID Connect Provider.
- C. Create a custom external authentication provider.
- D. Develop a custom Auth server in AWS.

Correct Answer: B

QUESTION 4

Refer to the exhibit.

Outfitters (NTO) is using Experience Cloud as an Identity for its application on Heroku. The application on Heroku should be able to handle two brands, Northern Trail Shoes and Northern Trail Shirts.

A user should select either of the two brands in Heroku before logging into the community. The app then performs Authorization using OAuth2.0 with the Salesforce Experience Cloud site.

NTO wants to make sure it renders login page images dynamically based on the user's brand preference selected in Heroku before Authorization.

what should an identity architect do to fulfill the above requirements?

- A. For each brand create different communities and redirect users to the appropriate community using a custom Login controller written in Apex.
- B. Create multiple login screens using Experience Builder and use Login Flows at runtime to route to different login screens.
- C. Authorize third-party service by sending authorization requests to the community- url/services/oauth2/authorize/cookie_value.
- D. Authorize third-party service by sending authorization requests to the community- url/services/oauth2/authorize/expid_value.

Correct Answer: D

QUESTION 5

Universal Containers (UC) uses Global Shipping (GS) as one of their shipping vendors. Regional leads of GS need access to UC's Salesforce instance for reporting damage of goods using Cases. The regional leads also need access to dashboards to keep track of regional shipping KPIs. UC internally uses a third-party cloud analytics tool for capacity planning and UC decided to provide access to this tool to a subset of GS employees. In addition to regional leads, the GS capacity planning team would benefit from access to this tool. To access the analytics tool, UC IT has set up Salesforce as the Identity provider for Internal users and would like to follow the same approach for the GS users as well. What are the most appropriate license types for GS Regional Leads and the GS Capacity Planners? Choose 2 Answers

- A. Customer Community Plus license for GS Regional Leads and External Identity for GS Capacity Planners.
- B. Customer Community Plus license for GS Regional Leads and Customer Community license for GS Capacity Planners.
- C. Identity Licence for GS Regional Leads and External Identity license for GS capacity Planners.
- D. Customer Community license for GS Regional Leads and Identity license for GS Capacity Planners.

Correct Answer: BD
