QUESTION 1

Universal Containers (UC) has a mobile application for its employees that uses data from Salesforce as well as uses Salesforce for Authentication purposes. UC wants its mobile users to only enter their credentials the first time they run the app. The application has been live for a little over 6 months, and all of the users who were part of the initial launch are complaining that they have to re-authenticate. UC has also recently changed the URI Scheme associated with the mobile app. What should the Architect at UC first investigate?

A. Check the Refresh Token policy defined in the Salesforce Connected App.

B. Validate that the users are checking the box to remember their passwords.

C. Verify that the Callback URL is correctly pointing to the new URI Scheme.

D. Confirm that the access Token\\'s Time-To-Live policy has been set appropriately.

Correct Answer: A

QUESTION 2
