QUESTION 1

A company wants to standardize exception tracking, handling, and analytics. Given the following actions:

1. Build a company wide logging service hosted on a middleware platform
2. Create case object records for exceptions based thresholds
3. Change all their Apex Loggers to publish Application Exceptions as custom Platform Events.

Which two specifications should the integration architect include in the logging service architecture? Choose 2 answers

- A. Receive Application Events through Change Data Capture (CDC).
- B. Create Salesforce Cases using the Salesforce REST, SOAP or Bulk API.
- C. Create Salesforce Cases conditionally using automatic Case creation rules.
- D. Subscribe to the Application Exceptions using the Salesforce Streaming API.

Correct Answer: BC

QUESTION 2

An Architect is asked to build a solution that allows a service to access Salesforce through the API. What is the first thing the Architect should do?

- A. Create a new user with SystemAdministrator profile.
- B. Authenticate the integration using existing Single Sign-On.
- C. Authenticate the integration using existing Network-BasedSecurity.
- D. Create a special user solely for the integration purposes.

Correct Answer: D

QUESTION 3

Northern Trail Outfitters (NTO) has recently changed their Corporate Security Guidelines. The guidelines require that all cloud applications pass through a secure firewall before accessing on-premise resources. NTO is evaluating middlewaresolutions to integrate cloud applications with on-premise resources and services.

What are two considerations an Integration Architect should evaluate before choosing a middleware solution? Choose 2 answers

- A. The middleware solution is capable of establishing a secure API gateway between cloud applications and on-premise resources.

- B. An API gateway component is deployable behind a Demilitarized Zone (DMZ) or perimeter network.
- C. The middleware solution enforces the OAuth security protocol.
- D. The middleware solution is able to interface directly with databases via an ODBC connection string.

Correct Answer: AB

QUESTION 4

An integration architect needs to build a solution that will be using the Streaming API, but the data loss should be minimized, even when the client re-connects every couple of days. Which two types of Streaming API events should be considered? Choose 2 answers

- A. Generic Events
- B. Change Data Capture Events
- C. PushTopic Events
- D. High Volume Platform Events

Correct Answer: BD

QUESTION 5

A healthcareservices company maintains a Patient Prescriptions System that has 50+ million records in a secure database. Their customer base and data set growing rapidly. They want to make sure that the following policies are enforced:

1.

Identifiable patient prescriptions must exist only in their secure system's database and encrypted at rest.

2.

Identifiable patient prescriptions must be made available only to people explicitly authorized in the Patient Prescriptions System assigned nurses and doctors, patient, and people explicitly the patient may authorize.

3.

Must be available only to verified and pre-approved people or legal entities.

To enable this, the company provides the following capabilities:

1.

One-time use identity tokens for patients, nurses, doctors, and other people that expire within a few minutes.

2.

Certificates for legal entities.. RESTful services.

The company has a Salesforce Community Cloud portal for patients, nurses, doctors, and other authorized people. A limited number of employees analyze deidentified data in Einstein Analytics.

Which two capabilities should the integration architect require for the Community Cloud portal and Einstein Analytics?
Choose 2 answers

- A. Identity token data storage
- B. Bulk load for Einstein Analytics
- C. Callouts to RESTful services
- D. Encryption in transit and at rest

Correct Answer: BC
