**QUESTION 1**

In reviewing the customer's IT organization, you must determine the corporate model for IT funding.

Which two models would you encounter in this scenario? (Choose two.)

- A. direct revenue model
- B. cost center
- C. profit center
- D. investment center

Correct Answer: BC

QUESTION 2

You are consulting in a network architect role for a multinational corporation. As part of your contract, you have been asked to propose an update to the company's network design. You have completed the initial design draft.

Which statement describes what you should do next in your project?

- A. Begin to plan for a proof-of-concept demonstration to show why your design is superior to the current network.
- B. Schedule a time with the board of directors to present the proposed solution.
- C. Schedule the first phase of implementation.
- D. Share the design with the other network administrators and solicit feedback.

Correct Answer: D

QUESTION 3

What is the function of the aggregation tier in a traditional three tier Layer 2 network environment?

- A. The aggregation tier interfaces with lower tier Layer devices and provides a high-speed interconnect with the north-bound WAN edge device.
- B. The aggregation tier relays packets between the lower tier Layer 2 devices and functions as the gateway to the upper tier Layer 2 device.
- C. The aggregation tier provides network connectivity to end-user devices and other hosts and enforces network access policy.
- D. The aggregation tier connects to the Internet and with lower tier Layer 2 devices to provide Layer 3 gateway services for the network.

Correct Answer: B

QUESTION 4

What would be a Juniper Networks best practice for a network management network?

- A. Keep the out-of-band management network as flat and simple as possible.
- B. Use spanning tree to prevent loops within the out-of-band management network.
- C. Use in-band network management.
- D. Have a multi-tier out-of-band management network.

Correct Answer: D

QUESTION 5

Your customer frequently hosts visitors who are not employees of the organization. The visitors typically request Internet access but do not require access to corporate resources. Network security is the customer's primary concern.

Which solution should you include in your design proposal?

- A. SSL
- B. NAC
- C. QoS
- D. BYOD

Correct Answer: B
