**QUESTION 1**

You have configured a WAP using the EAP-TLS protocol. The WAP is connected to a LAN with a Windows Server server. Which of the following additional tasks may be necessary to ensure that wireless clients can connect? (Choose all that apply.)

- A. Enable PPP authentication.
- B. Issue computer certificates to clients.
- C. Issue user certificates or smart cards to users.
- D. Install and configure IAS.

Correct Answer: BC

---

**QUESTION 2**

You have just installed the DHCP service on a stand-alone Windows Server system. You place the server on one of the subnets. You soon discover that clients are not leasing an IP address from the server. You open the DHCP console and

see that the DHCP service is not started.

What should you do?

- A. Reinstall the DHCP service.
- B. Add the DHCP server to the domain.
- C. Authorize the DHCP server.
- D. Check the system event log to find any clues as to why the service will not start.

Correct Answer: D

---

**QUESTION 3**

You are working as the administrator at ABC.com. The ABC.com network consists of a single Active Directory domain named ABC.com. The ABC.com network contains a DMZ that contains a two-node Network Load Balancing cluster, which

is located in a data centre that is physically impenetrable to unauthorized persons.

The cluster servers run Windows Server Web Edition and host an e-commerce website. The NLB cluster uses a virtual IP address that can be accessed from the Internet.

What can you do to mitigate the cluster's most obvious security vulnerability?

- A. Configure the cluster to require IPSec.

- B. Configure the network cards to use packet filtering on all inbound traffic to the cluster.
- C. Use EFS on the server hard disks.
- D. Configure intrusion detection the servers on the DMZ.
- E. Configure Mac addressing on the servers in the DMZ.

Correct Answer: B

---

#### QUESTION 4

You have enabled RRAS on your Windows Server computer. You want to set up IP packet filtering to help you manage access from remote clients. Where in the Routing and Remote Access console will you enable IP packet filters?

- A. The properties of the remote-access ports
- B. The properties of the remote-access server
- C. The profile of a remote-access policy
- D. The conditions of a remote-access policy

Correct Answer: C

---

#### QUESTION 5

You have been hired as a consultant to help deploy IPSec for the network of a mediumsize manufacturing firm that is developing a number of new products and must share sensitive data about its products over the network. As part of the planning process, you must determine the best authentication method to use with IPSec. What are the authentication methods that can be used with IPSec? (Select all that apply.)

- A. Kerberos v5
- B. Perfect Forward Secrecy (PFS)
- C. Shared secret
- D. Diffie-Hellman groups

Correct Answer: AC
