QUESTION 1

USB fax/modems that conform to this subclass of the Communication Device Class (CDC) vendor neutral standard are Linux compatible (answer is a 3 letter acronym)

A. acm

Correct Answer: A

QUESTION 2

After running the command `mount /mnt`, the following error message is displayed: `mount: /mnt: device is busy.`

What is a common reason for this message?

A. The kernel has not finished flushing disk writes to the mounted device.

B. A user has a file open in the `/mnt` directory.

C. The previous `rm` command has not finished.

D. The files in `/mnt` have been scanned and added to the locate database.

E. The kernel thinks that a process is about to open a file in `/mnt` for reading.

Correct Answer: B

QUESTION 3

How many SCSI ids for peripherals can SCSI-1 support?

A. 5

B. 6

C. 7

D. 8

Correct Answer: C

SCSI-1 support total 7 peripherals. There are several different types of SCSI devices. The original SCSI specification is commonly referred to as SCSI-1. The newer specification, SCSI-2, offers increased speed and performance, as well as new commands. Fast SCSI increases throughput to more than 10MB per second. Fast-Wide SCSI provides a wider data path and throughput of up to 40MB per second and up to 15 devices. There there are Ultra-SCSI and Ultra-Wide-SCSI

QUESTION 4
