### QUESTION 1

The marketing team for a Magento Commerce website wants some categories to function as content-focused landing pages instead of product listing pages. They want to include a variety of elements on these pages. Including images, text content, and featured product displays.

The marketing team want to maintain this content themselves without involving a developer.

How do they accomplish this?

- A. Add the different content elements as widgets in the description field of each category functioning as a landing page
- B. Create a CMS Static Block with the content elements for each landing page and associate each block with the correct category
- C. Change the View the Type on each landing page Category to Display as CMS Page and add content element to CMS Content area
- D. Have a developer create a custom content fragment they can assign to a category and update for each landing page

Correct Answer: C

---

### QUESTION 2

Your customer has recently experienced a large uptick in traffic and added a second server. After the new server went online users started reporting they are losing all their products in their cart. After an engineer investigates you are told the sessions are being written to the file system while the cache is written to Redis.

Which two options will resolve the problem? Choose 2 answers

- A. Set your cart to use a custom URL
- B. Eliminate the load balancer for HTTPS traffic
- C. sessions to save to the database
- D. Set sessions to save to REDIS

Correct Answer: AD

---

### QUESTION 3

A merchant is using Magento to manage inventory. The procurement department needs to see which products in the Clothing attribute set have fewer than 50 items in stock while eliminating all unnecessary columns.

How do you do this?

- A. Install a 3rd-party module to provide this report
- B. Enable the Daily Product Inventory Report email feature

- C. Navigate to the Low Stock report and enter the filtering conditions.
- D. Create a new product grid view with the necessary filters and column selections

Correct Answer: B

---

#### QUESTION 4

A merchant has loaded their tax rates into Magento and assigned all of their taxable products to the correct tax class. They have also configured Magento so all customers, regardless of whether they are logged in, are assigned to a customer tax class. However, no tax is being added to orders.

What must the merchant do to complete their tax configuration?

- A. integrate a GeoIP service so Magento can correctly identify the customer's region.
- B. Edit each individual product to make sure that it is assigned to the right taxable region
- C. Create 3 tax rule associating the rates, customer tax class, and product tax class
- D. Select the correct tax rates within the customer tax class configuration

Correct Answer: D

---

#### QUESTION 5

A merchant plans to migrate product data from Magento 1 to Magento Commerce. During your analysis of a merchant's existing product data structure, you notice they have created multiple custom product attributes to manage the translation of color options across their websites.

You recommend utilizing a single custom product attribute to manage their color options

In addition to setting up the attribute, what must be done?

- A. Change the attribute scope to store view so the values can be managed separately for each language.
- B. Add all possible attribute values in each of the languages to the attribute.
- C. Create different attribute sets, one for each language and associate the attribute with its values to each,
- D. Add a default set of attribute values, and add store view specific labels to both the attribute and its values for the other two languages

Correct Answer: D
