QUESTION 1

A company that uses discreet manufacturing concepts to produce solar panels has a temporary change of glass supplier. The substitute glass will only be used for three months. The company also uses Bill of materials (BOM) version to track

changes of the raw materials.

Managers are manually adjusting the production picking lists to reflect the alternate glass that is being temporarily used. The time spent doing manual adjustments to production picking lists has become a burden.

You need to create a new BOM with the alternate glass and include a from and to date on the BOM version.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Edit the current route to reflect the substitute material.	
Create a new BOM and BOM version that includes the temporary glass substitute.	
Activate the BOM version that does not include the substitute glass.	
Activate and approve the new BOM version.	
Set up an alternative item number on the release product.	
Add from and to dates to the current and alternate BOM versions that reflect the time period that the new BOM version will be used.	

Correct Answer:

Edit the current route to reflect the substitute material.	Create a new BOM and BOM version that includes the temporary glass substitute.
	Add from and to dates to the current and alternate BOM versions that reflect the time period that the new BOM version will be used.
Activate the BOM version that does not include the substitute glass.	Activate and approve the new BOM version.
Set up an alternative item number on the release product.	

**QUESTION 2**

You are a production manager at a company which produces large batches of coffee and creamers.

After a quality inspection, batch 120008 of you cold brew coffee (item number CB-0001) was found to be too acidic and must be reworked.

You need to add 20 grams of sugar and stir the product for an additional 0.5 hours.

What three actions are required on the rework order? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Delete all items from the production formula except for 20 grams of sugar.
- B. Add 20 grams of sugar to the production formula.
- C. Delete all route operations except for a half an hour stirring operation.
- D. Manually reserve batch 120008 after estimating the batch order.
- E. Add a route operation for 0.5 run time hours of stirring.

Correct Answer: BDE

QUESTION 3**SIMULATION**

You are a functional consultant for Contoso Entertainment System USA (USMF).

You need to assign a cost of 1,000 US dollars to the night shift.

To complete this task, sign in to Dynamics 365 portal. You must complete Task 1 before completing this task. Task 1 is the creation of a new cost category named NightShift for the night shift.

Correct Answer:

You need to configure a cost group with the type set to 'Direct Manufacturing'

QUESTION 4**DRAG DROP**

You need to set up the system to calculate the overhead rates automatically for production.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Define the basis for calculating costs as absorption.
- Create overhead calculation node for materials as surcharge and labor as rate for setup time.
- Create overhead calculation node for materials as input unit based and labor as rate for setup time.
- Create cost groups.
- Associate cost groups to items and cost categories.
- Define the basis for calculating costs as surcharge.
- Create price total and cost group nodes on costing sheet.
- Associate cost groups to items and resources.

Answer Area

Correct Answer:

Actions

-
-
- Create overhead calculation node for materials as input unit based and labor as rate for setup time.
-
- Associate cost groups to items and cost categories.
- Define the basis for calculating costs as surcharge.
- Create price total and cost group nodes on costing sheet.
-

Answer Area

Create cost groups.

Associate cost groups to items and resources.

Create overhead calculation node for materials as surcharge and labor as rate for setup time.

Define the basis for calculating costs as absorption.

QUESTION 5

A company uses Process manufacturing for most products and Discreet manufacturing for other products. The company

is creating a formula for a new product. The new item will be used to make a name brand product and two generic brand products.

This item has the following requirements:

1.

Production of the name brand and generic products must use the same formula.

2.

The company must produce all three items at the same time.

You need to create a produced item that can make two generic items and one main item.

How should you set up the item?

A. Create the name brand product as the main product and use a formula production type. Create the two generic items as a formula planning production type planning items. Copy the formula from the name brand item into each of the generic items.

B. Create the name brand product as the main product and use a formula production type. Create the two generic products as co-products as part of the formula for the name brand product.

C. Create the name brand item as a Bills of material production type item. Create the two generic items as a sub-assembly on the Bills of material for the name brand product.

D. Create the name brand item as a Bills of material production type item. Add the two generic items on the Bills of material for the name brand product and use line type phantom.

Correct Answer: B
