QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solutions,

while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 for Finance and Operations for their Lean manufacturing environment.

There has been an engineering change to a fixed quantity product that is in production. This change will add an additional processing step as the second step. The existing version must be phased out and replaced by the new version.

You need to ensure that the engineering change takes affect at the end of the month.

Solution:

1.) Create an activity for the new process step and add it to the existing production flow. Set the expiration date to the end of the month 2.) Create a Kanban rule that incorporates the new activity with an effective date of end of the month

3.) Edit the existing Kanban rule. Set the expiration date to the end of the month.

4.) Activate the new production flow

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing plant uses batch tracking of raw materials, semi-finished goods, and finished goods.

It is difficult to determine when semi-finished and finished goods were produced and expired.

You need to incorporate automatic batch expiration dates for tracked items that are produced.

Solution:

1.

Assign shelf life period in days to the items that require expiration dates.

2.

Create a new reservation hierarchy that places batch at one.

3.

Assign the new reservation hierarchy to the items that require expiration dates.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 3

A company uses Process manufacturing.

You need to review formulas and how the different ingredient types impact the batch balancing process.

Which ingredient types should you use? To answer, drag the appropriate ingredient types to the correct scenarios. Each ingredient may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll

to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Ingredient types	Answer Area	Ingredient type
none	The ingredient has a potency-based batch attribute.	Ingredient type
filter	The estimated quantity and balanced quantity for an ingredient are the same.	Ingredient type
active	When the amount of active ingredient less than expected, you must add more of this ingredient.	Ingredient type
compensating	The neutral ingredient is used to reach the desired batch size of finished goods.	Ingredient type

Correct Answer:

Ingredient types

Answer Area

The ingredient has a potency-based batch attribute.

The estimated quantity and balanced quantity for an ingredient are the same.

When the amount of active ingredient less than expected, you must add more of this ingredient.

The neutral ingredient is used to reach the desired batch size of finished goods.

Ingredient type

QUESTION 4

A company manufactures high-end speaker systems. You have different configurations available for customers to customize features including finishes and speaker materials. You have a product configuration model with bill of material lines and conditions for each component.

A customer can optionally add on protective covers, but only if a non-metal material is selected. If any other material is selected, the covers cannot be added. You add the following attributes:

Attribute	Attribute values
Speaker material	Metal, Polymer, Cloth
Corner protection	Yes, No

You need to create an expression-based constraint that will only allow Corner Protection if Metal is not selected. How should you complete the expression? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Implies [SpeakerMaterial " ", CornerProtection]

Correct Answer:

Answer Area

Implies [SpeakerMaterial == != < > " Metal Cloth Polymer ", ! = False CornerProtection]

QUESTION 5

A company makes lubricants and greases used in the automotive industry. The company plans to implement Dynamics 365 for Finance and Operations. The system must meet the following requirements:

Schedule the batch production of products.

Plan for inventory fluctuations of ingredients that are used across different products.

Schedule delivery of amounts of proprietary compounds used during production from vendors to keep production runs on schedule and eliminating excess stock on hand or delayed production.

The company is starting the initial setup of their Dynamics 365 environment.

Select and Place:

Setup levels	Setup option	Setup level
<input type="text" value="Company level"/>	Warehouse location	<input type="text"/>
<input type="text" value="Item level"/>	Catch weight	<input type="text"/>
	Batch control group	<input type="text"/>
	Safely datasheet	<input type="text"/>

Correct Answer:

Setup levels

Company level

Item level

Setup option

Warehouse location

Catch weight

Batch control group

Safely datasheet

Setup level

Company level

Item level

Company level

Item level
