**QUESTION 1**

A company sells large batches of chemicals. Item specifications vary from batch to batch.

You must fulfill multiple orders from the same batch of chemicals. If a single batch cannot be reserved, manual reservation must be used. The system must also make reservations based on the earliest batch receipt date.

You need to set up a new chemical item that automatically uses the new batch reservation logic.

Which three settings should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. In the Tracking dimension group, select Coverage plan by dimension for batch number.
- B. In the Item model group, select FEFO date-controlled.
- C. In the Item model group, select the FIFO inventory model.
- D. In the Item model group, select Same batch reservation and Consolidate requirements.
- E. In the Storage dimension group, select Coverage plan by dimension for the site and warehouse dimensions.

Correct Answer: ACD

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solutions, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 for Finance and Operations for their Lean manufacturing environment.

There has been an engineering change to a fixed quantity product that is in production. This change will add an additional processing step as the second step. The existing version must be phased out and replaced by the new version.

You need to ensure that the engineering change takes affect at the end of the month.

Solution:

- 1.) Create an activity for the new process step and add it to the existing production flow. Set the expiration date to the end of the month
- 2.) Create a Kanban rule that incorporates the new activity with an effective date of end of the month
- 3.) Edit the existing Kanban rule. Set the expiration date to the end of the month.
- 4.) Activate the new production flow

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B
