QUESTION 1

HOTSPOT

A multinational organization is evaluating Dynamics 365 Supply Chain Management.

Each regional office uses processes and procedures developed internally without input from the other offices. The organization wants to perform a gap analysis to understand redundancies and additional requirements in their system.
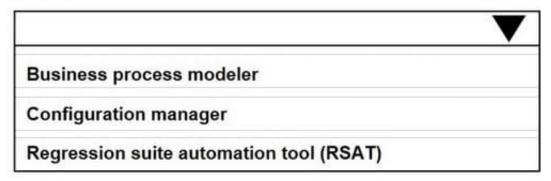

You need to recommend a solution.

Which tool should you recommend? To answer, select the appropriate options in the answer area.
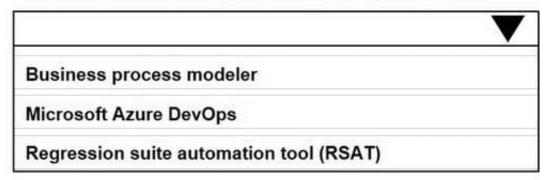

NOTE; Each correct selection is worth one point.

Hot Area:

![Pass2Lead](https://Pass2Lead.com)
Identify differences between regional office processes and procedures.

▼
Business process modeler
Configuration manager
Regression suite automation tool (RSAT)

Track the progress of the implementation project and its alignment to documented processes and procedures.

▼
Business process modeler
Microsoft Azure DevOps
Regression suite automation tool (RSAT)

Identify differences between standard company processes and how the system works

▼
Business process modeler
Configuration manager
Regression suite automation tool (RSAT)

Correct Answer:

![Pass2Lead](https://Pass2Lead.com)
Identify differences between regional office processes and procedures.

Business process modeler
Configuration manager
Regression suite automation tool (RSAT)

Track the progress of the implementation project and its alignment to documented processes and procedures.

QUESTION 2

DRAG DROP

A customer is planning to migrate to Dynamics 365 Finance.

![Pass2Lead](https://Pass2Lead.com)
You need to recommend a cloud or on-premises solution based on the customer\\'s business requirements.

Which deployment type should you recommend? To answer, drag the appropriate deployment types to the correct requirements. Each deployment type may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Deployment types

On-premises only
Cloud only
Cloud or on-premises

Answer Area

Requirement	Deployment type
Vendor collaboration	Deployment type
Office integration	Deployment type
Warehousing Power BI reports	Deployment type

Correct Answer:

Deployment types

On-premises only
Cloud only
Cloud or on-premises

Answer Area

Requirement	Deployment type
Vendor collaboration	Cloud only
Office integration	Cloud or on-premises
Warehousing Power BI reports	Cloud only

QUESTION 3

DRAG DROP

You are planning a Dynamics 365 implementation.

You need to recommend a solution for the different types of environment instances.

What should you recommend? To answer, drag the appropriate instance types to the correct scenarios. Each instance type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Instance types

Tier 1
Tier 2
Production

Answer Area

Scenario	Instance type
Single-box instance that the customer can use as an automated build environment.	Instance type
Multi-box instance that customers can use for user acceptable testing.	Instance type
Environment that uses Microsoft SQL server.	Instance type

Correct Answer:

Instance types

Answer Area

Scenario	Instance type
Single-box instance that the customer can use as an automated build environment.	Tier 1
Multi-box instance that customers can use for user acceptable testing.	Tier 2
Environment that uses Microsoft SQL server.	Production

---

QUESTION 4

A company plans to implement Dynamics 365 Finance.

The company\\'s current system contains sales tax-related data.

You need to design a solution that sequences the transfer of sales tax codes and sales tax groups. What should you do?

A. Design a data migration scenario.

B. Write customization requirements.

C. Analyze data integration points.

D. Design user acceptance testing processes.

Correct Answer: A

QUESTION 5

HOTSPOT

A company is implementing the vendor collaboration functionality in Dynamics 365 Chain Management.

A vendor\\'s external user must be able to access the vendor portal and create new users. The external user must be able to create new users only for the vendor\\'s organization.
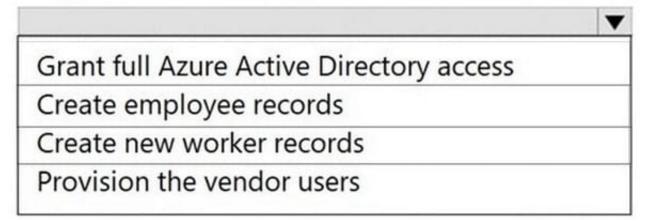

You need to set up the solution to meet the requirements.

How should you set up the solution? To answer, select the appropriate options in the answer area.
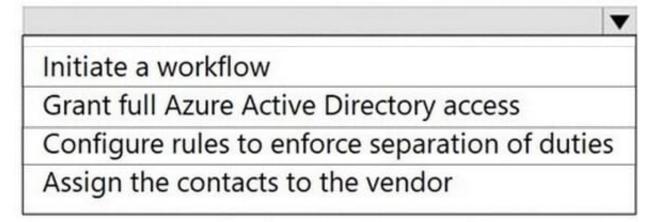

![Pass2Lead](https://Pass2Lead.com)
Hot Area:

Allow portal access for vendor users.

Grant full Azure Active Directory access
Create employee records
Create new worker records
Provision the vendor users

Grant access to create new users.

Initiate a workflow
Grant full Azure Active Directory access
Configure rules to enforce separation of duties
Assign the contacts to the vendor

Correct Answer:

![Pass2Lead logo](https://Pass2Lead.com)
Allow portal access for vendor users.

Grant full Azure Active Directory access
Create employee records
Create new worker records
Provision the vendor users

Grant access to create new users.

Initiate a workflow
Grant full Azure Active Directory access
Configure rules to enforce separation of duties
Assign the contacts to the vendor

Box 1: Provision the vendor users

Box 2: Initiate a workflow

Set up workflows to process vendor collaboration user requests To help guarantee that all the relevant tasks are completed, and that the appropriate approvals are given, you must set up workflows to handle vendor collaboration user

requests.

Vendor collaboration user requests are submitted either by external vendors that have the Vendor admin (external) security role or similar permissions, or by procurement professionals in your company. They can also be generated from

prospective vendor registration requests during the vendor onboarding process.

There are three types of requests:

Requests to provision a new user

![Pass2Lead](https://Pass2Lead.com)
Requests to inactivate an existing user

Requests to modify the security roles of an existing user

You must create two or more workflows to process all three types of vendor collaboration user requests.
