QUESTION 1

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	<input type="radio"/>	<input type="radio"/>
User2 can remove D:\Folder1 from the list of protected folders on Device2.	<input type="radio"/>	<input type="radio"/>
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can remove D:\Folder1 from the list of protected folders on Device2.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10.

You need to downgrade the computer to Windows 8.1.

Solution: You restart the computer to Windows Recovery Environment (Windows RE) and use the Advanced options.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A

Tested on W8.1 > Upgrade to W10. After upgrade completed , restart in WinRE. From winRE > Avanced Options > uninstall last Features Updates . Computer restart, uninstalls W10 and i could log on win 8.1 - answer is YES.

This Microsoft doc says the answer should be "YES"

<https://answers.microsoft.com/en-us/windows/forum/all/cant-roll-back-to-win-10/145b5900-420f-4685-a12a-3f8efb25ef36>

Here is how:

"Reset this PC and Go back buttons in Settings > System > Recovery do not function. Reset and roll back can be accessed from the Windows Recovery Environment by selecting System > Recovery > Advanced startup, and pressing Restart

now. Once in Windows Recovery, choose Troubleshoot.

Choose Reset this PC to perform a reset.

Choose Advanced options > Uninstall Updates > Uninstall latest feature update to perform a rollback."

QUESTION 3

Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 10 and are joined to the domain.

The domain is synced to Microsoft Azure Active Directory (Azure AD).

You create an Azure Log Analytics workspace and deploy the Update Compliance solution.

You need to enroll the computers in the Update Compliance solution.

Which Group Policy setting should you configure?

- A. Specify intranet Microsoft update service location
- B. Allow Telemetry
- C. Configure the Commercial ID
- D. Connected User Experiences and Telemetry

Correct Answer: C

Microsoft uses a unique commercial ID to map information from user computers to your Azure workspace. Copy your commercial ID key from any of the Windows Analytics solutions you have added to your Windows Portal, and then deploy it to user computers.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-get-started>

QUESTION 4

You have the Microsoft Deployment Toolkit (MDT) installed.

You install and customize Windows 10 on a reference computer.

You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers.

Which command should you run before you capture the image?

- A. dism
- B. wpeinit
- C. bcdedit
- D. sysprep

Correct Answer: D

Sysprep (System Preparation) prepares a Windows client or Windows Server installation for imaging. Sysprep can remove PC-specific information from a Windows installation (generalizing) so it can be installed on different PCs.

Reference: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/sysprep--system-preparation--overview>

QUESTION 5

You have 500 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You plan to distribute certificates to the computers by using Simple Certificate Enrollment Protocol (SCEP).

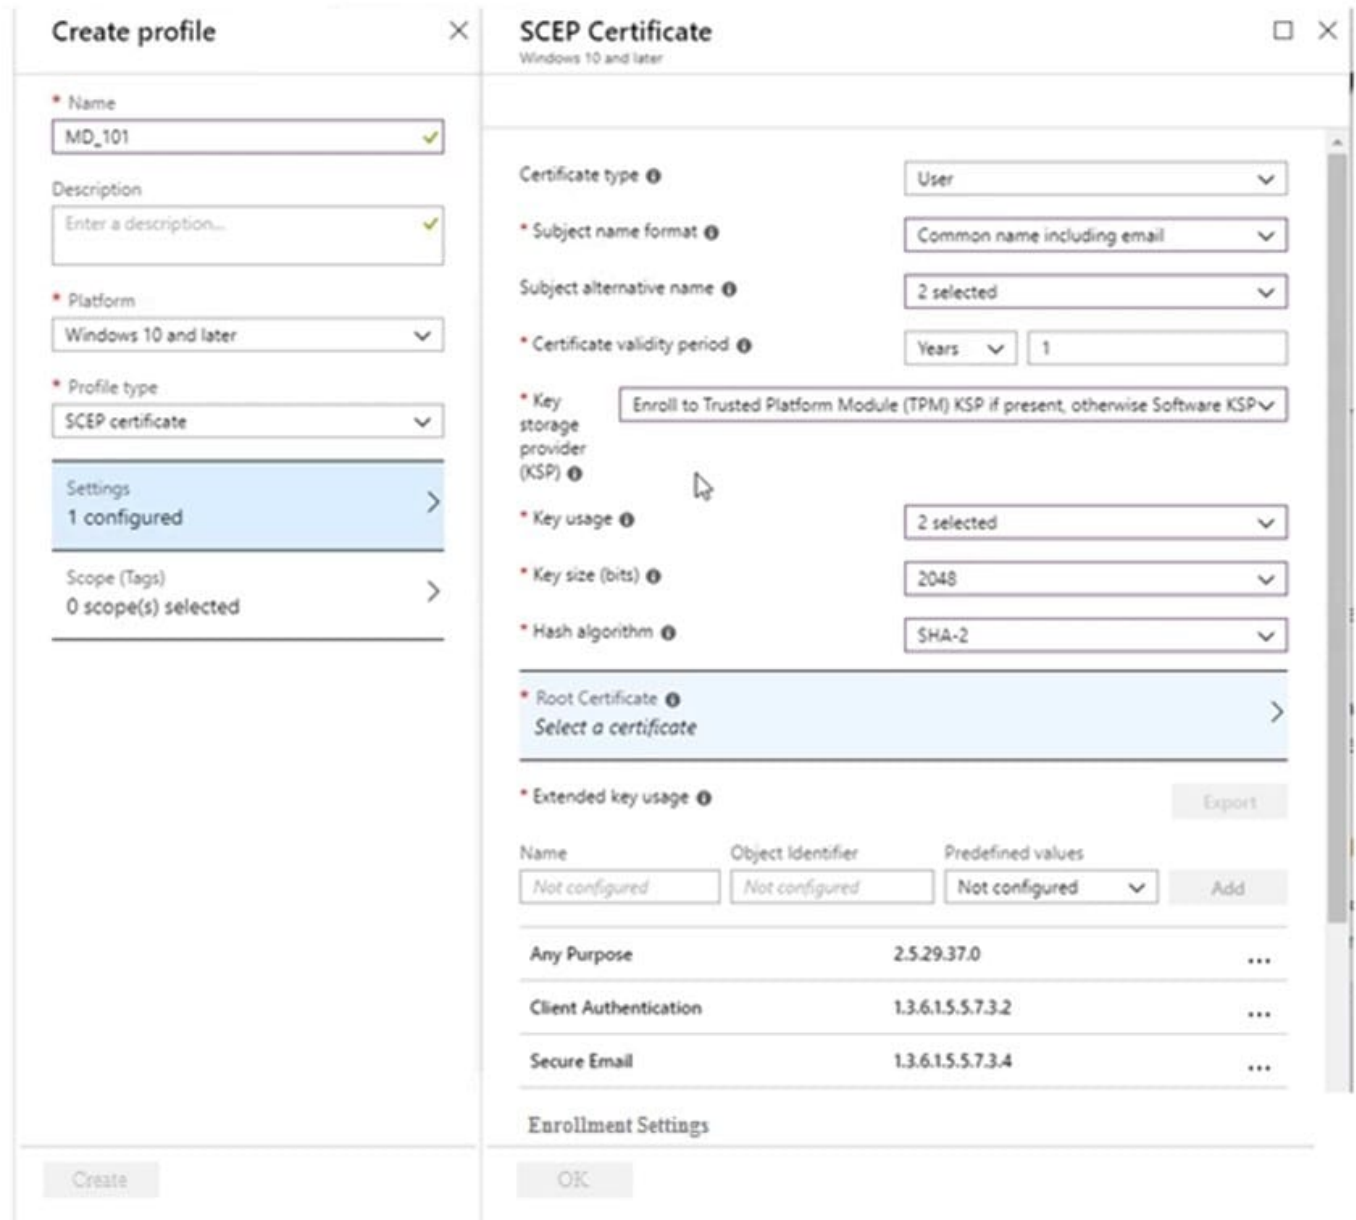

You have the servers shown in the following table.

Name	Configuration
Server1	Domain controller
Server2	Root certification authority (CA)
Server3	Subordinate certification authority (CA)
Server4	Network Device Enrollment Service (NDES)

NDES issues certificates from the subordinate CA.

You are configuring a device profile as shown in the exhibit. (Click the Exhibit tab.)

You need to complete the SCEP profile.

- A. Server1
- B. Server2
- C. Server3
- D. Server4

Correct Answer: C

As NDES issues certificates from the subordinate CA located at Server3, the root certificate should be used for

Server3.
