QUESTION 1

An administrator configures a VPN and selects the Enable IPsec Interface Mode option in the phase 1 settings.

Which of the following statements are correct regarding the IPsec VPN configuration?

- A. To complete the VPN configuration, the administrator must manually create a virtual IPsec interface in Web Config under System > Network.
- B. The virtual IPsec interface is automatically created after the phase1 configuration.
- C. The IPsec policies must be placed at the top of the list.
- D. This VPN cannot be used as part of a hub and spoke topology.
- E. Routes were automatically created based on the address objects in the firewall policies.

Correct Answer: B

QUESTION 2

If a FortiGate unit has a dmz interface IP address of 210.192.168.2 with a subnet mask of 255.255.255.0, what is a valid dmz DHCP addressing range?

- A. 172.168.0.1 - 172.168.0.10
- B. 210.192.168.3 - 210.192.168.10
- C. 210.192.168.1 - 210.192.168.4
- D. All of the above.

Correct Answer: B

QUESTION 3

A FortiGate unit is configured with multiple VDOMs. An administrative account on the device has been assigned a Scope value of VDOM:root.

Which of the following items would an administrator logging in using this account NOT be able to configure?

- A. Firewall addresses
- B. DHCP servers
- C. FortiGuard Distribution Network configuration
- D. PPTP VPN configuration

Correct Answer: C

QUESTION 4

A firewall policy has been configured for the internal email server to receive email from external parties through SMTP. Exhibits A and B show the AntiVirus and Email Filter profiles applied to this policy.

What is the correct behavior when the email attachment is detected as a virus by the FortiGate AntiVirus engine?

- A. The FortiGate unit will remove the infected file and deliver the email with a replacement message to alert the recipient that the original attachment was infected.
- B. The FortiGate unit will reject the infected email and notify both the sender and recipient.
- C. The FortiGate unit will remove the infected file and add a replacement message. Both sender and recipient are notified that the infected file has been removed.
- D. The FortiGate unit will reject the infected email and notify the sender.

Correct Answer: A

QUESTION 5

Which of the following statements are correct regarding logging to memory on a FortiGate unit? (Select all that apply.)

- A. When the system has reached its capacity for log messages, the FortiGate unit will stop logging to memory.
- B. When the system has reached its capacity for log messages, the FortiGate unit overwrites the oldest messages.
- C. If the FortiGate unit is reset or loses power, log entries captured to memory will be lost.
- D. None of the above.

Correct Answer: BC
