QUESTION 1

Which is true of a provided interface associated with a port?

- A. identifies the services that the object owning the port expects of objects connected via that port.
- B. represents an interface that must be defined within the classifier that owns the port
- C. represents an interface that must be defined in the same package in which the classifier owning the port is defined
- D. identifies the services that the object owning the port can offer to other objects connected via that port

Correct Answer: D

QUESTION 2

What stereotype notation is NOT correct?

- A. A
- B. B
- C. C
- D. D

Correct Answer: D

QUESTION 3

Why are profiles NOT a first class extension mechanism?

- A. They do not allow for modifying existing metamodels.
- B. They do not permit customizing for domains, platforms, and methods.
- C. They permit removing constraints that apply to existing metamodels.
- D. They do not allow for modifying existing stereotypes.

Correct Answer: A

QUESTION 4

What is the difference between a tag definition and a tagged value?

- A. The properties of metaclasses are sometimes referred to as tag definitions. When a metaclass is applied to a model element, the values of the properties may be referred to as tagged values.
- B. The properties of stereotypes are sometimes referred to as tagged values. When a stereotype is applied to a model element, the values of the properties may be referred to as tag definitions.
- C. The properties of stereotypes are sometimes referred to as tag definitions. When a stereotype is applied to a model element, the values of the properties may be referred to as tagged values.
- D. They are synonyms.

Correct Answer: C

QUESTION 5
