QUESTION 1

You want to check the custom ABAP codes in your system for security vulnerabilities and you want to use the Code Vulnerability Analyzer (CVA) for carrying out these extended security checks.

What needs to be done for this purpose? Note: There are 2 correct answers to this question.

- A. Execute transaction ST12 to start the analysis
- B. Execute program RSLIN_SEC_LICENSE_SETUP
- C. Run CVA from the ABAP Test Cockpit
- D. Run CVA from the ABAP Trace

Correct Answer: CD

QUESTION 2

What is the User Management Engine (UME) property "connect on pooling" used for? Note: There are 2 correct answers to this question.

- A. To improve performance of requests to the LDAP directory server
- B. To avoid unauthorized request to the LDAP directory server
- C. To create a new connect on to the LDAP directory server for each request
- D. To share server resources among requesting LDAP clients

Correct Answer: AD

QUESTION 3

You are evaluating the "Cross-client object change" option using transact on SCC4 for your Unit Test Client in the development environment.

Which setting do you recommend?

- A. Changes to repository and cross-client customizing allowed
- B. No changes to repository and cross-client customizing objects
- C. No changes to cross-client customizing objects
- D. No changes to repository objects

Correct Answer: B

QUESTION 4

You are setting up your SAP NetWeaver AS in a SSL client scenario. What are the reasons to choose an "anonymous SSL Client PSE" setup?

Note: There are 2 correct answers to this question.

- A. To support mutual authentication
- B. To support server-side authentication and data encryption
- C. To use as a container for the list of CAs that the server trusts
- D. To have an individual identity when accessing a specific application

Correct Answer: BC

QUESTION 5

You have implemented CUA in your organization and you want to set the field distribution attribute as follows: Maintain a default value in the central system that is automatically distributed to the child systems when you create a user. After distribution, the data is maintained only locally and is no longer distributed if you change it in the central or child system.

Which field distribution parameter do you maintain?

- A. Redistribution
- B. Local
- C. Global
- D. Proposal

Correct Answer: D
