QUESTION 1

What built-in administrator role allows all rights except for the creation of administrative accounts and virtual systems?

A. superuser

B. vsysadmin

C. A custom role is required for this level of access

D. deviceadmin

Correct Answer: D

QUESTION 2

A network engineer experienced network reachability problems through the firewall. The routing table on the device is complex. To troubleshoot the problem the engineer ran a Command Line Interface (CLI) command to determine the egress interface for traffic destined to 98.139.183.24. The command resulted in the following output:

```
runtime route lookup
---------------------------
virtual-router: vr1
destination: 98.139.183.24
result: route not found
```

How should this output be interpreted?

A. There is no route for the IP address 98.139.183.24, and there is a default route for outbound traffic.

B. There is no interface in the firewall with the IP address 98.139.183.24.

C. In virtual-router vrl, there is a route in the routing table for the network 98.139.0.0/16.

D. There is no route for the IP address 98.139.183.24, and there is no default route.

Correct Answer: D

QUESTION 3

Subsequent to the installation of new licenses, the firewall must be rebooted

A. True

B. False

Correct Answer: B

QUESTION 4

In order to route traffic between layer 3 interfaces on the PAN firewall you need:

A. VLAN

B. Vwire

C. Security Profile

D. Virtual Router

Correct Answer: A

QUESTION 5

The "Disable Server Return Inspection" option on a security profile:

A. Can only be configured in Tap Mode

B. Should only be enabled on security policies allowing traffic to a trusted server.

C. Does not perform higher-level inspection of traffic from the side that originated the TCP SYN packet

D. Only performs inspection of traffic from the side that originated the TCP SYN-ACK packet

Correct Answer: B
