QUESTION 1

When you want to refer to a specific placeholder in the presentation details, which identifier do you use?

- A. Placeholder ID
- B. Key ID
- C. Placeholder Key
- D. ItemKey

Correct Answer: C

QUESTION 2

With Sitecore MVC, how do you ensure a field cannot be edited when you use the field helper to render content?

- A. Use thenon-editable equivalent field type.
- B. Use the DisableWebEdit option.
- C. Set the editable parameter to "false".
- D. Mark the field as non-editable in the field definition item.

Correct Answer: B

QUESTION 3

While developing using Sitecore MVC, you modify a file in your Visual Studio project outside of the webroot folder. What can you do to see the changes within the Sitecore installation?

- A. Publish the file using the Sitecore Rocks Publish file command.
- B. Copy the file to the webroot using Visual Studio's Publish command.
- C. Use the Sitecore Global Publish to publish everything.
- D. Publish the entire site when you are in the Content Editor.

Correct Answer: B

QUESTION 4

You have been hired to create a company's website, and, as you prepare, you must define the data structures in Sitecore to create items and content. What should you use to define your data structures?

- A. Templates

- B. Config files
- C. SQL tables
- D. Renderings

Correct Answer: A

QUESTION 5

Your published layout.cshtml file contains a static placeholder with a "main" placeholder key and you want to add renderings to the presentation details of a template's standard values; however you cannot see the "main" placeholder key you added to the layout. Of the available options, which is the best explanation of what happened?

- A. There is a missing configuration element in web.config for placeholders.
- B. The wrong layout is associated with the current template.
- C. A Sitecore publish is required to show placeholder keys when editing presentation details.
- D. There is no placeholder settings item for the associated "main" placeholder key.

Correct Answer: D
