QUESTION 2

Which view type would you develop for structural components with multiple placeholders when using the ASP.NETCore Rendering SDK?

- A. Standard view components
- B. Model-bound components
- C. Custom view components
- D. Partial view components

Correct Answer: C

QUESTION 3

How would you debug the Sitecore Content Delivery role that is running on containers?

- A. Attach to the w3wp.exe process of the container from your IDE.
- B. Open the container logs in Docker Desktop and review for errors.
- C. Right-click the container in Docker Desktop and select Debug.
- D. Stop the container and run a debug command from PowerShell.

Correct Answer: B

QUESTION 4

Which three areas of Sitecore allow you to view the available workflow commands of an item you are editing? (Choose three.)

- A. Security Editor
- B. Workflow Command
- C. Experience Editor
- D. Content Editor
- E. Workbox
- F. Path Analyzer

Correct Answer: CDE

QUESTION 5

If the path of a specific module file is not set in the sitecore.json file, what will happen when you run standard serialization commands?

- A. When you run push or pull serialization commands, the tool will search for your module to access the includes.
- B. You will receive a warning advising you some modules are not included and ask if you wish to include them in the

serialization attempt.

C. The paths and related items included in the module will not be serialized when you run a push or pull command.

D. Only selected items in the specific module will be serialized, but it will not include all of them.

Correct Answer: C
