QUESTION 1

Which two configurations are valid options for Microsoft Clustering in an Enterprise Vault environment? (Select two.)

- A. Active/Active
- B. Active/Passive
- C. N+1 (Hot Standby)
- D. Failover with replica
- E. Failover with fault tolerance

Correct Answer: BC

QUESTION 2

An administrator wants to create a new Vault Store Group to contain Vault Stores from a number of Enterprise Vault Servers. The administrator plans to configure all of the Vault Stores to have a sharing level of `Share in group`.

Which factor does the administrator need to consider prior to making this change?

- A. the major versions of the Enterprise Vault software on the servers that host the Vault Stores
- B. the network connectivity between Enterprise Vault servers that host the Vault Stores
- C. the Operating System versions of the Enterprise Vault servers that host the Vault Stores
- D. the number of CPU's and their clock speeds on the Enterprise Vault servers that host the Vault Stores

Correct Answer: B

QUESTION 3

An administrator creates a rule to tag all items which include Social Security Numbers with a "PII" tag. The administrator runs the policy in Test Mode and reviews the report to verify the tag will be applied to the expected items. The administrator then disables Test Mode and runs the policy; however, the tag fails to be applied to the expected items and the Test Mode report continues to be generated.

Which action should the administrator perform to ensure the tag is applied to the expected items and the report is generated in production mode?

- A. enable SMTP journaling
- B. configure the retention plan in the Exchange Mailbox Policy
- C. install the Enterprise Vault Retention license
- D. enable Windows File Server Resource Manager

Correct Answer: A

QUESTION 4

Which two customer scenarios are likely to result in multiple Enterprise Vault (EV) directories? (Select two.)

- A. separate active directory domains with bi-directional trusts
- B. security or administrative boundaries between different groups of the organization
- C. different retention policy requirements between different departments in the business
- D. different single instance requirements for different departments in the business
- E. very slow connectivity between archiving targets and EV servers in different data centers

Correct Answer: BE

QUESTION 5

Which set of logs would best help an administrator troubleshoot Outlook client connectivity issues with the Enterprise Vault server?

- A. the Enterprise Vault Client log and a dtrace log output of the StorageCrawler process on the Enterprise Vault server
- B. the latest Internet Information Services (IIS) log on the Enterprise Vault server and the Enterprise Vault Client log
- C. the latest Internet Information Services (IIS) log on the Enterprise Vault server and the Veritas Enterprise Vault Converters event log on the Enterprise Vault server
- D. the dtrace log output of the StorageFileWatch process and the VaultCachePH.log file from the client computer

Correct Answer: B
