QUESTION 1

Which additional metadata is captured when backing up vCloud Director VMs?

- A. Replica metadata
- B. vApp metadata
- C. vDC metadata
- D. Backup metadata

Correct Answer: B

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/vcloud_director_backup.html?ver=95

QUESTION 2

An Availability engineer has configured Veeam Backup and Replication to replicate a mission critical VM to a DR site on an hourly basis and with 24 restore points. The production site has suffered a storage failure and needs to bring up the mission critical machine as soon as possible. Which step should the Availability engineer do next?

- A. Create a failover plan
- B. Failover to the replica VM
- C. Failback of the replica VM
- D. Planned failover to me replica VM

Correct Answer: B

QUESTION 3

Which of the following statements are true regarding backup copy jobs in Veeam Backup and Replication? (Choose two.)

- A. The backup copy job creates a forever forward incremental backup chain
- B. The backup copy job creates a single file with multiple restore points included within for archival purposes
- C. During the backup copy job process, a VM snapshot is created for consistency
- D. Retention settings maintain the desired number of restore points as well as offer optional GFS for archival purposes
- E. Backup copy jobs copy entire VBK, VIB, or VRB files from the source backup repository to the target backup repository

Correct Answer: AD
