### QUESTION 1

A virtual machine in your environment has been hit by a virus. You need to restore the virtual machine as fast as possible. At the same time, you need to make sure that any dormant virus on the backed up virtual machine is detected. What restore method should you use when recovering to a new location?

- A. Instant VM Recovery with "staged restore"
- B. Instant VM Recovery with "secure restore"
- C. SureBackup
- D. Virtual disk restore

Correct Answer: B

Reference: [https://helpcenter.veeam.com/docs/backup/em/em\\_disk\\_restore.html?ver=100](https://helpcenter.veeam.com/docs/backup/em/em_disk_restore.html?ver=100)

### QUESTION 2

A physical Linux server protected by a centrally managed Veeam agent is physically damaged. A VMware vSphere infrastructure is available, and the physical server is eligible for virtualization. Which recovery step provides the lowest possible RTO?

- A. Use Instant VM Recovery to VMware vSphere.
- B. Use Instant Disk Recovery to VMware vSphere.
- C. Use Export Disk Content as Virtual Disk to create a new VM.
- D. Use Bare Metal Restore to VMware vSphere VM.

Correct Answer: A

Explanation: According to the Veeam Agent for Linux User Guide<sup>1</sup>, you can use the Restore volumes option to perform bare metal recovery of your computer. However, this option requires you to boot from the Veeam Recovery Media and may take some time to complete.

Another option is to use Instant VM Recovery to VMware vSphere. This option allows you to run your Linux computer directly from a backup file as a VMware VM without restoring any data. This can significantly reduce your RTO and provide

immediate access to your applications and data.

---

### QUESTION 3

Which of the following is a backup mode that can be configured within a Veeam Agent for Windows backup job?

- A. Reverse incremental with periodic active full backups

- B. Forward incremental and reverse incremental, both with optional periodic synthetic and/or active full backups
- C. Forward incremental with optional periodic synthetic and/or active full backups
- D. Reverse incremental with optional periodic synthetic full backups

Correct Answer: C

---

#### QUESTION 4

An administrator needs to configure a backup job that dynamically adds new VMware hosted SQL servers. How can this be accomplished?

- A. Create a dynamic backup job in Enterprise Manager.
- B. Create a job based on vSphere tags.
- C. Create a CSV file that is scanned before the backup job starts.
- D. Enable application aware processing.

Correct Answer: B

---

#### QUESTION 5

Which can be used if the user key for an encrypted backup is forgotten or lost?

- A. Veeam Support can supply a metakey after employee and company identity has been verified
- B. There is no way to restore the data in this case
- C. Veeam Backup Enterprise Manager can decrypt using a master key - also called Enterprise Manager key
- D. Veeam ONE Encryption Key report will provide all required password(s)
- E. Veeam Search Server can scan all saved credentials and report if any saved credential will decrypt the data

Correct Answer: C
