**QUESTION 1**

Which of following NIC aggregation protocols are supported by an Isilon cluster? (Choose 2)

A. LACP

B. Etherchannel

C. FCE

D. Legacy LACP

E. EtherFCE

Correct Answer: AB

**QUESTION 2**

Which file access protocols are enabled by default in an Isilon cluster? (Choose 2)

A. SMB

B. CIFS

C. NFS

D. HTTP

E. FTP

Correct Answer: AC

**QUESTION 3**

In OneFS v5.5 the default protection level was N+1. What is the default protection level in OneFS v6.5 with at least an 18TB cluster? (Choose 1)

A. +2:1

B. +2

C. +3:1

D. +3

Correct Answer: A

**QUESTION 4**

The NLM protocol is used in some NFS client connections. What does the NLM protocol do? (Choose 1)

A. Provides file locks for NFS v2 and 3 clients

B. Provides file locks for CIFS clients

C. Provides file locks for NFS v2, 3, and 4 clients

D. Provides file locks for SMB v1,2, and 3 clients

Correct Answer: A

---

QUESTION 5

How are inodes are allocated in an Isilon cluster? (Choose 1)

A. Inodes are allocated as needed

B. Inodes are allocated as needed up to a maximum of 128 per directory

C. 1024 inodes are allocated

D. 1024 inodes are allocated per directory

Correct Answer: A

---

QUESTION 6

What is the largest size of LUN that is usable by a Windows client when using Isilon iSCSI? (Choose 1)

A. 16 TB

B. 32 TB

C. 64 TB

D. 128 TB

Correct Answer: B

---

QUESTION 7

What does the SmartCache setting control? (Choose 1)

A. SmartCache acts as a write coalescer

B. SmartCache acts as a read coalescer

C. SmartCache controls the size of the level 1 cache in nodes

D. SmartCache controls the size of the level 2 cache in nodes

![Pass2Lead](https://Pass2Lead.com)
Correct Answer: A

**QUESTION 8**

FilePools enable you to do what? (Choose 1)

A. Create user defined attributes in the web administration interface.

B. Set different protection and IO optimization settings for a filtered set of files

D. Throttle network throughput as needed for file storage

Correct Answer: B

**QUESTION 9**

When is a SnapShot license required? (Choose 2)

A. To use Snapshots with NDMP backups

B. To use Snapshots on a source cluster for SyncIQ

C. To use Snapshots on a target cluster for SyncIQ

D. To enable Volume Shadow Copy Service.

Correct Answer: CD

**QUESTION 10**

What settings does changing the disk access pattern affect? (Choose 2)

A. Data layout on disks within a node

B. File system stripe size

C. Pre-fetching

D. Disk block size

Correct Answer: AC

**QUESTION 11**

You are configuring a synchronization between two clusters using SyncIQ. You\\'re root directory is /ifs/data. You create an include statement for /ifs/data/media and an exclude statement of /ifs/data/media/video. What will be synchronized to the other cluster? (Choose 1)

A. Nothing will be synchronized.

B. Everything in the ifs/data folder will be synchronized.

C. Everything in the /ifs/data/media folder will be synchronized.

D. Everything in the /ifs/data/media folder except the /ifs/data/media/video folder will be synchronized.

Correct Answer: D

**QUESTION 12**

What types of data stores are supported for virtualization on an Isilon cluster? (Choose 2)

A. VMFS

B. iSCSI

C. NFS

D. SMB

Correct Answer: BC

**QUESTION 13**

What is the default impact policy level of a FlexProtect job? (Choose 1)

A. Low

B. Medium

C. High

D. There is no default. The priority of each job must be set by an administrator.

Correct Answer: B

**QUESTION 14**

A legal e-discovery company provides a hosting service that organizes and stores seldom used content for up to 10 years. Which cluster configuration is the most appropriate? (Choose 1)

A. A five node X200 cluster.

B. A five node X200-SSD cluster.

C. A ten node 36NL cluster.

D. A 25-node S200 cluster.

Correct Answer: C

**QUESTION 15**

Which of the following can be used to implement a Streaming disk access pattern on an Isilon cluster? (Choose 2).

A. is auth command

B. File Pool Policies

C. sysctl command

D. File System Explorer

Correct Answer: BD
