QUESTION 1

Ethernet Medium Access Control Address is a

- A. 32 bit Hardware Interface Address which includes a Vendor ID.
- B. 48 bit IP Network Interface Address which includes a Vendor ID.
- C. 32 bit IP Network Interface Address which includes a Vendor ID.
- D. 48 bit Hardware Interface Address which includes a Vendor ID.
- E. None of the other alternatives apply.

Correct Answer: D

QUESTION 2

Data conferencing and control system interfaces are Asynchronous and require which five settings?

- A. Byte length Setting
- B. Flow Control Setting
- C. Steady ones Setting
- D. Parity Setting
- E. Bit Rate Setting
- F. Flag Sync Setting
- G. Start bits Setting
- H. Stop Bits Setting

Correct Answer: ABDEH

QUESTION 3

Which of the following is mandatory Video coding for H.323?

- A. H.281
- B. H.263
- C. H.261
- D. H.260
- E. H.280

Correct Answer: C

QUESTION 4

Which video coding improves motion compensation and describes 4CIF resolution?

- A. H.211
- B. H.264
- C. H.263
- D. H.261
- E. H.271

Correct Answer: C

QUESTION 5

Ethernet can run at which of the following speeds?

- A. 10/100/1000 Million Bits per second
- B. 10/100/1000 Million Packets per second
- C. 10/100/1000 Million Blocks per second
- D. 10/100/1000 Million Bytes per second

Correct Answer: A

QUESTION 6

The H.323 requires mandatory support of which video coding?

- A. H.262
- B. H.261
- C. MPEG1
- D. MPEG2
- E. H.263

Correct Answer: B

QUESTION 7

Which of the following correctly describes the purpose of an Acoustic Echo Canceller (AEC)?

- A. An AEC reduces the room loudspeaker contribution to the local microphone sent to the far-end.
- B. An AEC provides a means to reduce room noise sent to the far-end.
- C. An AEC provides compensation for room acoustics to improve microphone sensitivity and gain.
- D. An AEC provides a means to reduce room reverberation as heard by the far-end.
- E. An AEC provides compensation for room acoustics to better allow the reduction of echo returned to the far-end.

Correct Answer: AE

QUESTION 8

Which two types of Networks are capable of providing consistent, guaranteed QoS Constant Bit Rate Transport with a steady reliable clock source?

- A. ISDN Circuit Switched Data
- B. ISDN D-Channel
- C. Public Virtual Private Network
- D. X.25 / X.75 Packet Switching
- E. ATM CBR-AAL0 Service
- F. ISDN Circuit Switched Voice

Correct Answer: AE

QUESTION 9

Which of the following describes Request for Comment documents?

- A. Internet Protocol Standards specifications
- B. Signal to noise ratio specifications
- C. Signal Regeneration specifications
- D. WAN hardware specifications of operations
- E. Signal Loss specifications
- F. LAN hardware specifications

Correct Answer: A

QUESTION 10

UDP Media Channels are identified by

- A. 32 bit Source Port Number and 32 bit Destination Port Number.
- B. 48 bit MCU Number and the 32 bit Gateway Number.
- C. V35 Port and RS449 Port.
- D. None of the other alternatives apply..
- E. 16 bit Source Port Number and 16 bit Destination Port Number.
- F. 32 bit Address or Signaling Port and ISDN Port Number.

Correct Answer: E

QUESTION 11

Which of the following are the lower layer Standards that describe the Transport, Control, and Multipoint Communication Services of T.120?

- A. T.121, T.122, T.123, T.124
- B. T.120, T.121, T.122, T.123
- C. T.122, T.123, T.124, T.125
- D. T.120, T.122, T.123, T.124

Correct Answer: C

QUESTION 12

Switched Channel Circuit Network by definition is network that provides

- A. Cell Switching.
- B. permanent full-network connections from point A to point B.
- C. permanent half-duplex network connections from point A to point B.
- D. temporary half-duplex connection from point A to point B.
- E. Packet switching.
- F. temporary full-duplex connection from point A to point B.

Correct Answer: F

QUESTION 13

The H.225 describes a reliable transport for which two video conferencing requirements?

- A. Data (T.120) Packets
- B. Call Signaling Packets
- C. Audio Packets
- D. RAS Signaling Packets
- E. Video Packets

Correct Answer: AB

QUESTION 14

In the H.323 document which two components are described for Multipoint Conferencing?

- A. Multipoint Controller and the Multipoint Processor
- B. Data Processor and Video Switcher
- C. None of the other alternatives apply.
- D. Multipoint Audio Processor and D-Channel Network Interface Processor

Correct Answer: A

QUESTION 15

Encryption security of Video and Audio will be used to make

- A. only the packet payload unreadable
- B. only the first packet header unreadable
- C. None of the other alternatives apply.
- D. only the packet headers unreadable

Correct Answer: A
