- A. vRealize APIs
- B. vCloud Connector
- C. vRealize Automation
- D. VMware NSX

Correct Answer: C

---

**QUESTION 4**

An administrator wants to more proactively react to alarms in the datacenter. Which vRealize operations availability feature would be most helpful in identifying problems before they impact end users?

- A. Dynamic Thresholds
- B. Dynamic Alerts
- C. Smart Alerts
- D. Self-Adjusting Alerts

Correct Answer: B

---

#### QUESTION 5

As part of setting up a company's disaster recovery plan a project manager has identified the need to synchronize storage used by the virtual machines to a remote disaster recovery site. Which product or component can be used to perform this task?

- A. vRealize Automation
- B. vCloud Connector
- C. Datastore Clusters
- D. vSphere Replication

Correct Answer: C

---

#### QUESTION 6

An administrator is designing a multi-tier application, where one virtual machine will be located in the private cloud and the other in VMware's vcloud air environment. Which feature will allow the administrator to address the variable latency and limited bandwidth concerns of routing traffic across the Internet?

- A. Dedicated Cloud
- B. Backend as a Service
- C. Direct Connect
- D. Horizon Air

Correct Answer: B

---

#### QUESTION 7

An administrator is developing a workflow for a company's test and development environment and needs to run a script that will generate a work order ticket. Which VMware product provides out of the box plug-ins to assist the administrator in completing this task?

- A. vRealize Operations
- B. vRealize Orchestrator
- C. vCenter Server
- D. vCloud Connector

Correct Answer: D

---

#### QUESTION 8

A consulting company has just won a contract to provide cloud infrastructure services for a regionally-based department store. The contract requires the automation of workflows for running scripts on virtual machines as they are provisioned via the customer organization portal. Which two products will help achieve this task? (Choose two.)

- A. vCenterServer
- B. vFabric Application Director
- C. vRealize Orchestrator
- D. vRealize Automation

Correct Answer: AD

---

#### QUESTION 9

An administrator wants to ensure that all new virtual workloads created with vRealizeAutomation are built to the correct specifications and are aligned with corporate service levels. Which vRealize automation feature provides this capability?

- A. Lifecycle management
- B. Policy-based provisioning and governance
- C. Intelligent resourceGovernor
- D. Workflow and task automation

Correct Answer: B

---

#### QUESTION 10

An administrator is examining a data center to validate that it is operating as efficiently as possible. Which option represents an Efficiency challenge the administrator might face?

- A. Needing to easily roll back changes to workloads during testing and development.
- B. Wanting to provide multi-tenant access to cloud resources without compromising security.

- C. Needing semi-isolated and autonomous environments for the application development teams.
- D. Wanting to align IT costs with corporate models by classifying IT as an operating expense.

Correct Answer: C
