QUESTION 1

Which two statements are true about using project data objects? (Choose two.)

- A. Any process in the project can access a project data object.
- B. The value of a project data object does not vary between processes.
- C. Project data objects can be used only as input arguments to a process.
- D. Project data objects can be used in data associations and expressions.

Correct Answer: AD

QUESTION 2

Which two product features might a process analyst use the most in contrast to a process developer? (Choose two.)

- A. Process simulation.
- B. Business rules.
- C. Mediator services.
- D. Web Forms.
- E. BPM Studio.
- F. ADF forms.

Correct Answer: AD

QUESTION 3

Which two case elements can have due dates configured? (Choose two.)

- A. Case
- B. Case data
- C. Events
- D. Milestones
- E. Activities

Correct Answer: AB

QUESTION 4

You have a requirement to dynamically assign tasks at run time based on the employee's title. Which three could be used to accomplish this assignment? (Choose three.)

- A. Use parametric roles to map the individual parametric role assignments and then map individual users to specific titles in the workspace using extended user properties.
- B. Use parametric roles to map the individual parametric role assignments and then map LDAP groups to specific titles in the workspace using extended user properties.
- C. In LDAP, ensure that individual users have been given titles and, in the workspace, associate the LDAP title attribute to a parametric role.
- D. Use a business rule in the human task to dynamically assign work items to specific users or an LDAP group based on employee title.
- E. In the process, edit the properties of the swimlane and assign a "title" string data object in the process payload to define a parametric role.

Correct Answer: ABD

QUESTION 5

Which three options are human task patterns that cause the token to wait in the calling process until the human task is completed? (Choose three.)

- A. FYI
- B. Initiator
- C. Management
- D. Manual
- E. Group

Correct Answer: BCE

Explanation: Pattern Description

Pattern	Description
Complex	Uses a complex routing flow that is defined within the human task.
Management	Uses the management chain pattern where the assignee is set to the management chain pattern for the process participant belonging to the group or role assigned to the swimlane.
FYI	Bases assignment on the participant, role, or group defined in the swimlane. Similar to the user interactive activity, but the FYI activity does not wait until completion before continuing.
Group	Uses the group vote pattern. The assignee for the task is automatically set to the role or group associated with the lane. This interactive activity can only be added to swimlanes that are assigned to roles or groups.
Initiator	The initiator pattern is used to create a process instance.

QUESTION 6

The initial performer of a task is determined by the role associated with the swim lane in which the task is modeled except when you use a(n) _____.

- A. complex task
- B. user task
- C. FYI task
- D. group task

Correct Answer: A

Explanation: A complex user task uses a complex routing flow that is defined within the humantask.BPM Studio offers a number of human task patterns out of the box, to make it easy to implementthe most common types of human tasks. For example, the Simple pattern just assigns individualusers or groups. The Management pattern is used for a sequential list of approvers up themanagement chain. Initiator is for the person who kicks off the process.For most of these,swimlane roles are used to determine assignments. For the Complex task, however, the swimlaneis irrelevant, and routing and assignments are typically more complicated.Note: Swimlanes are the horizontal lines that run across the process editor. All flow objects mustbe placed within a swimlane.Swimlanes can also be used to group flow objects based on the roles defined within your process.Swimlanes that contain user tasks must have roles assigned to them. Swimlanes visually displaythe role responsible for performing each flow object within your process. Additionally, you canhave multiple swimlanes that are assigned to the same role.Swimlanes can make your process more readable when you must use the same role in differentparts of the same process.

QUESTION 7

Which statement is true about the architecture of the business rules component?

- A. Facts are vocabulary elements that are used to construct tests and actions for verbal rules.
- B. You can use globals to help users modify rules without having to rework the rule logic.
- C. Unlike decision tables, if-then rules provide conflict resolution and gap analysis.
- D. In the action of a rule, you typically use the Fire RL (Rule Language) verb to invoke inferencing.

Correct Answer: A

QUESTION 8

Which two statements are true about running and analyzing simulation results? (Choose two.)

- A. You must wait until a simulation run finishes in order to see up-to-date results in charts.
- B. During a simulation run, in-flight instances are always allowed to finish before a simulation completes.
- C. During a simulation run, cost and time data are automatically collected for all activities, events, and gateways.
- D. You can use only Business Process Composer to create and run simulations.
- E. The number appearing above the left-most bar atop an activity represents the high water mark for the queue.

Correct Answer: BD

Explanation: In Business Process Composer you can only run simulations based on test data you define using Business Process Composer.

Let in-flight instances finish before simulation ends	If selected, simulation ends only when the specified number of instances completes. If unselected, simulation stops after the simulation duration is completed. At that point, all incomplete instances are shown in either "in-process" or "queue" status.

QUESTION 9

Which is a capability of Web Form rules?

- A. altering execution of an unbounded ADF task flow
- B. inserting validation rules into an ADF page that a BPM Studio wizard has generated

- C. encoding-business policies that can be easily modified by end users at run time
- D. populating a dynamic drop-down list by accessing a RESTful service

Correct Answer: D

QUESTION 10

To establish the integration between BPM Suite and BAM 12c, you need to _____.

- A. do nothing as they are integrated out-of-the-box
- B. set the DisableProcessMetricsMBean setting to false on the SOA server
- C. set the DisableProcessMetricsMBean setting to false on the BAM server
- D. set the DisableMonitorExpressMBean setting to false on the SOA server

Correct Answer: B

QUESTION 11

Which statement describes how web forms are built?

- A. Technical developers create web forms by using BPM Studio and then business analysts edit them by using BPM Process Composer.
- B. Business analysts create web forms by using BPM Process Composer and then technical developers sometimes edit them by using BPM Composer.
- C. End users create web forms by using BPM Process Workspace and then technical developers sometimes edit them by using BPM Process Composer.
- D. Technical developers create web forms by using BPM Process Composer and then business analysts sometimes edit them by using BPM Studio.

Correct Answer: D

QUESTION 12

Which two statements are accurate in describing features of Business Process Workspace? (Choose two.)

- A. To see tasks containing a particular word in the task title, you need to create a custom view.
- B. The definition and data for a new view can be shared with a colleague.

- C. A custom view needs to be created to enable the delegation of a task to another user.
- D. In a task view, the task list can be sorted based upon any visible column heading.

Correct Answer: BC

QUESTION 13

In which two tools can you explore the path taken by a running process instance? (Choose two.)

- A. Enterprise Manager
- B. Process Composer
- C. Weblogic Console
- D. Business Process Workspace

Correct Answer: AD

QUESTION 14

Which statement is accurate about verbal rules and business phrases?

- A. Verbal ruled can be created in Business Process Composer, but not in BPM Studio.
- B. For a particular verbal rule, conditions and actions can include derived business phrases or user-defined business phrases, but not both.
- C. Derived business phrases are automatically created by using facts and globals in the rules dictionary.
- D. Verbal rules must be created in a separate ruleset from general rules and decision tables.

Correct Answer: BC

QUESTION 15

Which two statements are true about business indicators used for process analytics? (Choose two.)

- A. A counter must be associated with a counter mark in order for the counter to be incremented.
- B. Measures specify how process analytics data can be filtered or grouped.
- C. If you do not define any business indicators, no data is captured at a sampling point.

D. Measurement marks are defined on sequence flows and are visible on the model.

E. The dimensions you have defined are visible on the process model.

Correct Answer: AD
