**QUESTION 1**

What is required on the network to allow classification of traffic flow by a specific user?

- A. Install the Blue Coat Authentication and Authorization Agent (BCAAA) on a separate server.
- B. Nothing. Users are automatically discovered by your PacketShaper.
- C. Enable Users and Groups on the PacketShaper Setup page.
- D. Install the Blue Coat Authentication and Authorization Agent (BCAAA) on your PacketShaper appliance.

Correct Answer: A

---

**QUESTION 2**

After inserting a PacketShaper inline between a switch and a router, communications are slow. Which command, executed repeatedly, can help to determine if there are errors on the PacketShaper interfaces?

- A. link show
- B. net nic
- C. tap health
- D. traffic flow

Correct Answer: A

---

**QUESTION 3**

Which PacketShaper parameter could an administrator apply to the Folder class?

- A. Policy
- B. Partition
- C. Outbound/Default classification
- D. Matching rule

Correct Answer: C

---

**QUESTION 4**

Which feature can be used to modify the amount of bandwidth available to an application based on the time of day?

- A. Adaptive Response
- B. BCAA Server
- C. Command Scheduling
- D. Event Notification

Correct Answer: D

---

**QUESTION 5**

Which control limits the number of simultaneous TCP flows in a class?

- A. class licenses
- B. policy delay bound
- C. system limits
- D. policy flowlimit

Correct Answer: B

---

**QUESTION 6**

What do instances of bold text in the PacfcetShapet Wffie lice represent?

- A. Default Policy
- B. Policy that n actively being used
- C. Policy that was changed during the current session
- D. Inheritable Policy

Correct Answer: B

---

**QUESTION 7**

Which method does PacketShaper use to create child classes for Oracle databases?

- A. Individually for each published application

- B. Individually by encoding name
- C. Once, for all Oracle traffic running on the subnet
- D. Individually for each database that is discovered

Correct Answer: C

---

#### QUESTION 8

Which feature does PacketShaper use to control the rate of User Datagram Protocol (UDP) traffic?

- A. PacketShaper's techniques in rate control and queuing
- B. PacketShaper's TTL headers
- C. Priority policies that allocate bandwidth based on UDP traffic
- D. Window size

Correct Answer: C

---

#### QUESTION 9

Which option allows an administrator to differentiate Citrix-based applications and protect their performance?

- A. Choose Priority 7 from the matching rule's Citrix-specific classification criteria to identify print traffic.
- B. Assign the default partition and policy to all parts of the Citrix traffic tree, regardless of application urgency.
- C. Enable discovery and let PacketShaper discover the Citrix-based applications, then create a traffic class for each one.
- D. When Citrix applications generate a large amount of print traffic, merge multiple Citrix-based applications into one traffic class

Correct Answer: A

---

#### QUESTION 10

The "traffic active" CU command displays the maximum number of TCP, UDP, and legacy flows on the PacketShaper. What interval are these maximums automatically checked against current conditions and updated if necessary?

- A. Once per day

- B. Every second
- C. Every 15 minutes
- D. Every 30 minutes

Correct Answer: A

---

#### QUESTION 11

Which option best describes the concept of "Round Trip" as defined in the Monitor Response Time window?

- A. The percentage of transactions completed within the total delay threshold when a client and server exchange of S/N and ACK packets
- B. The average time in milliseconds from the sending of a client's SYN packet, to the return of the server's ACK packet
- C. A network delay or server delay threshold that has been set via the command-line interface
- D. The average time in milliseconds certain transactions use, categorized as total, network, and server delays

Correct Answer: C

---

#### QUESTION 12

Which CLI command will display the current rate and connection information about active hosts?

- A. hostdb hosts
- B. hostdb accounting
- C. hostdb info
- D. hostdb show

Correct Answer: B

---

#### QUESTION 13

Which option contains adaptive response agents?

- A. Network health, Unit health and Application health
- B. Component health, Application health and Active interfaces

- C. Unit health, CPU load balancing and Cluster health
- D. Component health, Active interfaces and Network health

Correct Answer: A

---

#### QUESTION 14

Which steps will produce the data required to create an application-specific matching rule?

- A. Use class criteria track to enable tracking on a specific class and then use class criteria recent to see a list of recent values for the class
- B. Use class criteria attributes to see attributes for a specific class and then use class criteria recent to see a list of recent values for the class
- C. Use class criteria trade to enable tracking on a specific class and to see a list of recent values for the class
- D. Use class criteria attributes to see attributes for a specific class and then use class criteria track to track the recent values for the class

Correct Answer: D

---

#### QUESTION 15

Which three (3) criteria are to be specified in a matching rule? (Select three)

- A. Service group
- B. Diffserv marking
- C. Traffic type
- D. SSL URL P
- E. Interface
- F. VLAN identification

Correct Answer: ABC

---
