**QUESTION 1**

Prior to installing a Session Border Controller (SBC), which action would highlight a problem with inadequate customer network bandwidth?

- A. Commission the SBC.
- B. Register the SBC.
- C. Network assessment (CIRS/NANO).
- D. Provision the SBC.

Correct Answer: C

---

**QUESTION 2**

What is the function of the SBC routing profile?

- A. It defines the SIP domain.
- B. It defines the destination URI.
- C. It defines the next hop for SIP traffic.
- D. It defines the complete destination route.

Correct Answer: C

---

**QUESTION 3**

Which condition can alert you of a problem with the SBC?

- A. Optical drive tray open
- B. Flashing reset button
- C. LCD display
- D. LEDs: link status/activity, hard disk drive access, over-temperature

Correct Answer: D

---

**QUESTION 4**

Which element can signaling manipulation modify?

- A. EMS IP address

- B. Call server IP address
- C. Management IP address
- D. Domain

Correct Answer: D

---

#### QUESTION 5

For which users is the Avaya SBC Remote Worker configuration typically implemented?

- A. Users administered with the same Communication Manager Network Region
- B. Remote users, travelling employees, remote offices
- C. Users administered with the same Server Flow
- D. Analog and DCP users only

Correct Answer: B

---

#### QUESTION 6

Where can you look up SBC alarm descriptions?

- A. SBC CLI
- B. Avaya PLDS
- C. SBC Documentation: Appendices of Administration Guide
- D. EMS CLI

Correct Answer: C

---

#### QUESTION 7

What is the primary reason for implementing a session border controller?

- A. Faster, more reliable network bandwidth
- B. Secure enterprise communications
- C. Reliable failover management
- D. Remote access and alarming

Correct Answer: B

---

**QUESTION 8**

You have been asked to create and apply a Time of Day (ToD) domain policy to secure a SIP trunk.

What is the correct order of the policy application sequence?

- A. Packet examined, destination evaluated, ToD evaluated, policy applied
- B. Packet examined, ToD evaluated, flow determined, policy applied
- C. Packet examined, ToD evaluated, policy applied, routing applied
- D. packet examined, flow determined, policy applied, ToD evaluated

Correct Answer: B

---

**QUESTION 9**

Why is the DB9-to-DB9 or the RJ45-terminated serial cable that is shipped with the SBC necessary for installing the SBC?

- A. The duplication cable between the two series synchronizes function and data.
- B. It carries the trunk side Ethernet traffic.
- C. It carries the call server (line) side Ethernet traffic.
- D. It connects SBC Console with the service laptop/PC for initial software installation.

Correct Answer: D

---

**QUESTION 10**

In which two flows are Media Interfaces administered in SIP trunking?

- A. Dell server and HP server
- B. NTP server and DNS server
- C. Call server and TFTP server
- D. Trunk server and call server

Correct Answer: D

---

**QUESTION 11**

When installing either configuration on the same hardware, which statement describes the relationship between the standalone SBC and the SBC + EMS ("all-in-one")?

- A. The standalone SBC software is the same as the SBC + EMS ("all-in-one") software.

- B. The standalone SBC and the SBC + EMS ("all-in-one") must be controlled by the same EMS.
- C. The standalone SBC and the SBC + EMS ("all-in-one") are identical, regardless of hardware platform.
- D. The standalone SBC requires a different EMS from the SBC + EMS ("all-in-one").

Correct Answer: A

---

**QUESTION 12**

As part of the Mobile Workspace (Remote Worker) administration, what does cluster administration do?

- A. It groups trunks and monitors them for load balancing.
- B. It groups endpoints and monitors them for traffic shaping.
- C. It groups trunks and applies similar rules and policies.
- D. It groups endpoints and applies similar attributes to them.

Correct Answer: D

---

**QUESTION 13**

Why can you not select an Installation type of "EMS + UC-Sec" for a high Availability (duplicated) configuration?

- A. The EMS has too few interfaces for High Availability.
- B. The SBC has too few Interfaces for High Availability.
- C. EMS and UC-Sec have- different interfaces and are incompatible with High Availability.
- D. High Availability configurations always require a separate (standalone) EMS.

Correct Answer: D

---

**QUESTION 14**

How do you view SBC Call Trace information?

- A. SBC GUI: Diagnostics, Protocol tab
- B. SBC CLI
- C. EMS GUI: Log Viewer, option = logs
- D. EMS GUI: Logs > System Logs, Class = Trace

Correct Answer: A

---

**QUESTION 15**

Which entity can also function as the Personal Profile Manager (PPM) for a Remote worker cluster?

- A. System Platform
- B. Session Manager
- C. Communication Manager
- D. System Manager

Correct Answer: B
